Financial Statements

for the Year Ended
31 December 2025

In the name of Allah, The Beneficent, The Merciful

Ahli Islamic, Ahli Bank SAOG

Shari'a Supervisory Board Report

All praise to Allah, and peace be upon His messenger, his family, his companions and those who followed them with until the Day of Judgment.

To the Shareholders of Ahli Bank SAOG

Assalam Alikum wa Ramat Allah wa Barakatuh

In compliance with the letter of appointment, the Shari'a Supervisory Board has reviewed the products and the contracts relating to the transactions which were made by Ahli Islamic, Ahli Bank SAOG (the "Bank") during the period (01.01.2025 to 31.12-2025) ended 2025 to ensure that they comply with the *Fatawa* issued by the Board as per Sharia rules and principles.

The Bank's management is responsible for ensuring implementation of resolutions of the Shari'a Supervisory Board and to inform the Board with regard to the operations and the developments, which require issuance of resolutions from the Shari'a Supervisory Board and directing the Bank towards compliance with the provisions and principles of Islamic Shari'a

The Shari'a Supervisory Board responsibility is to issuing Fatawa and monitoring their implementation based on the Shari'a audit reports for the Bank.

In opinion of the Board:

1. The contracts, transactions and dealings entered into by the Bank, which we reviewed, during the year ended 2025 are in compliance with Shari'a rules and principles.

2. The distribution of profit and charging of losses relating to investment accounts conform to the base that had been approved by the Shari'a Supervisory Board of the Bank in accordance with rules and principles of Islamic Shari'a.
3. All earning that has been realized from sources or by means prohibited by rules and principles of Islamic Shari'a have been disposed of by the management of the Bank to the accredited charity organization,
4. The Bank's management is not authorized to pay Zakat on behalf of the shareholders and the responsibility for payment of the Zakat lies with the shareholders.

We beg Allah the Almighty to grant us all the success.

Sharia Supervisory Board

1. **Sheikh Dr. Ali Mohieldin Al Qaradaghi (Chairman of the SSB)**

2. **Sheikh Dr. Ahmed Muzaffar Abdullah Al Rawahi (Deputy Chairman of the SSB)**

3. **Sheikh Dr. Abdul Rahman bin Mubarak Al Nofli (Member of the SSB)**

SSB Resolutions Year 2025

SSB Meeting	Resolution No.	Subject of the Resolution	Brief of the SSB Resolution
SSB 51st Meeting (SSB-51-2025)	1 (SSB –51 – 2025)	Minutes of SSB 50th Meeting	The SSB signed the Minutes of the 50 number Meeting.
	2 (SSB –51 – 2025)	Approval on Master BackTakaful Services Agreement	The SSB reviewed the Master BackTakaful Services Agreement and approved it.

Resolution # 2 (SSB – 52 – 2025)

Subject: Early Settlement Charges on Financing Contracts

All praise to Allah and May peace and blessings be upon His messenger, his family, his companions and all followers of his guidance.

On Sunday the 2 Saffar 1447 Hijri that corresponds to July 27, 2025 – meeting # (SSB – 52 – 2025) – the Sharia Supervisory Board of Ahli Islamic, Ahli Bank SAOG (SSB) reviewed the proposal of early settlement charges on financing contracts and gave its opinion as follows:

SSB Opinion

The proposed administrative fee, equivalent to 1% of the unpaid amount under sale-based contracts, is intended to cover the actual administrative costs incurred by the Bank, and must not include any element of profit or penalty. The Bank may, at its sole discretion, choose to waive a portion of the remaining amount in favor of the customer in the event of early settlement. However, such a waiver must remain entirely at the discretion of the Bank and must not be stipulated in the contract in advance, in adherence to Shari'a principles.

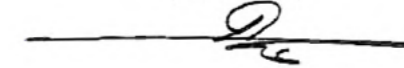

The SSB also emphasized the importance of clear disclosure to customers regarding the nature, purpose, and calculation method of the fee, in full compliance with Shari'a guidelines and the applicable instructions issued by the Central Bank.

And all praise is due to Allah.

Resolution # 3 (SSB – 52 – 2025)

Subject: Proposal to purchase assets under manufacturing and sell them upon completion on a Murabaha basis

All praise to Allah and May peace and blessings be upon His messenger, his family, his companions and all followers of his guidance.

On Sunday the 2 Saffar 1447 Hijri that corresponds to July 27, 2025 – meeting # (SSB – 52 – 2025) – the Sharia Supervisory Board of Ahli Islamic (SSB) reviewed the proposal concerning the purchase of assets under manufacturing and upon completion their sale through Murabaha structure. The Board expressed its opinion as follows:

SSB's Opinion:

The SSB approved setting a timeframe for suppliers to manufacture goods requested by customers, with clear contractual conditions between the bank and the suppliers. The SSB further approved the arrangement on the condition that the goods must be fully manufactured and ready for delivery before executing the Murabaha contract. This approval was granted temporarily for eight (8) months, during which the Product Development Department must develop Istisna' based financing product tailored to goods which are under manufacturing or construction.

And all praise is due to Allah.

Independent auditor's report to the shareholders of Ahli Bank SAOG (continued)

2

Report on the audit of the financial statements (continued)

Responsibilities of management and those charged with governance for the financial statements

These financial statements and the Islamic Window's undertaking to operate in accordance with Islamic Shari'ah's Rules and Principles, as determined by the Shari'ah Supervisory Board, are the responsibility of the Bank's Board of Directors.

The Banks' Board of Directors is responsible for the preparation and fair presentation of the financial statements in accordance with FAS issued by the AAOIFI as modified by CBO, and for such internal control as the Bank's Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Bank's Board of Directors is responsible for assessing the Islamic Window's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Bank's Board of Directors either intends to liquidate the Window or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ASIFI will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ASIFI, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Islamic window's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.

Independent auditor's report to the shareholders of Ahli Bank SAOG (continued)

3

Report on the audit of the financial statements (continued)

Auditor's responsibilities for the audit of the financial statements (continued)

- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Islamic window to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2025

1 LEGAL STATUS AND PRINCIPAL ACTIVITIES

Ahli Islamic (The Islamic Window) was licensed by Central Bank of Oman (CBO) to operate as an Islamic Banking Window of Ahli Bank SAOG (The Bank). The Islamic Window Sharia Supervisory Board (SSB) is entrusted to ensure Islamic Window's adherence to Sharia rules and principles in its transactions and activities. A report of the SSB on the Sharia compliance of the operations carried out by the Islamic Window during the year is included in the annual report. The Islamic Window offers a full range of Islamic banking services and products. The principal activities of the Islamic Window include accepting Sharia compliant funds, customer deposits, providing Sharia compliant financing based on Murabaha, Wakala, Musharaka, Ijarah, Istisna, Qard Hasan and undertaking investment activities and providing commercial banking services and other investment activities permitted under the Islamic Banking Regulatory Framework (IBRF) issued by the CBO. The Islamic Window was operating through a network of twenty six branches as at year end (31 December 2024: twenty five branches).

The Islamic Window employed 229 employees as at 31 December 2025 (31 December 2024: 209 employees).

2 BASIS OF PREPARATION

2.1 Statement of compliance

The Islamic Window is not a separate legal entity, the separate financial statements of the Islamic Window has been prepared to comply with the requirements of Articles 1.5.1.2 to 1.5.1.4 of Title 2 'General Obligations and Governance' of IBRF issued by the CBO. These financial statements are prepared in accordance with Financial Accounting Standards (FAS) issued by Accounting and Auditing Organisation for Islamic Financial Institutions (AAOIFI), the Sharia Rules and Principles as determined by the Sharia Supervisory Board of the Islamic Window and other applicable requirements of CBO. In accordance with the requirements of AAOIFI, for matters which are not covered by AAOIFI and other directives, the Islamic Window uses the relevant International Financial Reporting Standards (IFRS) issued by International Accounting Standards Board (IASB).

These financial statements pertain to the Islamic Window operations only and do not include financial results of the Bank. Statement of restricted investment accountholders, statement of Qard fund and Zakat are not presented as these are not applicable. Complete set of financial statements of the Bank is presented separately.

2.2 Basis of measurement

The financial statements have been prepared under the historical cost convention except for investments classified as instruments at Fair value through equity which have been measured at fair value.

2.3 Functional and presentation currency

The financial statements are prepared in Rial Omani (﷋) which is the functional and reporting currency of the Bank. The United States Dollar ('US\$') amounts shown in the financial statements have been translated from Rial Omani at an exchange rate of ﷋ 0.385 to each US\$, and are shown for the convenience of the user of financial statements only as supplemental information. All financial information presented in Rial Omani and US Dollars has been rounded to the nearest thousand, unless otherwise stated.

2.4 Use of judgements and estimates

The preparation of financial statements in conformity with FAS requires management to make judgments, estimates and assumptions that may affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected. The areas involving a higher degree of judgment or complexity, or areas where judgements and estimates are significant to the financial statements are disclosed in note 5.

3 STANDARDS, AMENDMENTS AND INTERPRETATIONS

There were no new standards adopted by the Islamic Window during the year in preparation of these financial statements.

3.2 New standards, amendments and interpretations issued but not yet effective

3.2.1 FAS 45 Quasi-Equity (Including Investment Accounts)

AAOIFI has issued FAS 45 in 2023. This standard prescribes the principles of financial reporting related to the participatory investment instruments (including investment accounts) in which an Islamic financial institution controls the underlying assets (mostly, as a working partner), on behalf of the stakeholders other than the owners' equity. Such instruments (including, in particular, the unrestricted investment accounts) normally qualify for on balance-sheet accounting and are reported as quasi-equity. This standard also provides the overall criteria for onbalance-sheet accounting for participatory investment instruments and quasi-equity, as well as, pooling, recognition, derecognition,

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE YEAR ENDED 31 DECEMBER 2025

3 STANDARDS, AMENDMENTS AND INTERPRETATIONS (continued)

3.2 New standards, amendments and interpretations issued but not yet effective (continued)

3.2.1 FAS 45 Quasi-Equity (Including Investment Accounts) (continued)

measurement, presentation and disclosure for quasi-equity. It further addresses financial reporting related to other quasi-equity instruments and certain specific issues. This standard shall be effective for the financial reporting periods beginning on or after 1 January 2026.

3.2.2 FAS 46 Off - Balance sheet assets under management

The objective of this standard is to establish the principles of financial reporting related to off-balance-sheet assets under management in line with the "AAOIFI Conceptual Framework for Financial Reporting" (the conceptual framework). This standard shall be effective for the financial periods beginning on or after 1st January 2026, with early adoption permitted. This standard shall be adopted at the same time as adoption of FAS 45 "Quasi - Equity (including Investment Accounts).

3.2.3 FAS 47 Transfer of assets between investment pools

The objective of this standard is to establish the principles of financial reporting principles that apply in respect of transfer of assets between various investment pools of an Islamic financial institution. This standard shall be effective for the financial periods beginning on or after 1st January 2026, with early adoption permitted.

3.2.4 FAS 48 Promotional Gifts and Prizes

AAOIFI has issued FAS 48 in 2024. This standard prescribes accounting and financial reporting principles for recognition, measurement, presentation and disclosures applicable to promotional gifts and prizes awarded by the Islamic financial institutions to their customers, including quasi-equity and other investment accountholders. This standard shall be effective on the financial statements for the annual financial reporting period beginning on or after 1 January 2026.

3.2.5 FAS 49 Financial Reporting for Institutions Operating in Hyperinflationary Economies

AAOIFI has issued FAS 49 in 2024. This standard outlines the principles governing financial reporting, including accounting treatments, presentation of financial statements and necessary disclosures for institutions applying AAOIFI Financial Accounting Standards (FAS), operating within hyperinflationary economies. This standard is developed taking into account the applicable Shari'ah principles and rules, as well as, the unique business models of such institutions while stipulating appropriate principles of financial reporting. The standard also prescribes a definition of a hyperinflationary economy and provides guidance on as to how to determine whether an economy qualifies as hyperinflationary. This standard shall be effective for the financial periods beginning on or after 1 January 2026.

3.2.6 FAS 50 Financial Reporting for Islamic Investment Institutions (Including Investment Funds)

AAOIFI has issued FAS 50 in 2024. This standard outlines financial reporting principles applicable to the Islamic investment institutions (IIs). In particular, it emphasises on bringing harmony and standardisation with regard to the form and contents of the financial statements of IIs. This standard prescribes the overall requirements for the presentation, minimum contents and recommended structure of their financial statements in a manner that facilitates truthful and fair presentation in line with Shari'ah principles and rules. This standard shall be effective for the annual financial statements beginning on or after 1 January 2027.

3.2.7 FAS 51 Participatory Ventures

AAOIFI has issued FAS 51 in 2025. This standard prescribes accounting and financial reporting principles for recognition, measurement, presentation and disclosures to apply in relation to participatory ventures (including most of the common structures/ products based on Mudaraba and Musharaka). This standard shall be applied in respect of accounting and financial reporting by the investor(s), the working partner(s), as well as, the participatory ventures with regard to all such participatory ventures that fall within the scope of this standard, including those with fixed and variable equity/ quasi-equity shares. This standard shall be effective for the financial statements of the institutions beginning on or after 1 January 2027.

4 SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these financial statements are set out below:

4.1 Foreign currency translation

Transactions in foreign currencies are translated into the respective functional currencies of the operations at the spot exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the rate of exchange at the reporting date. Any resulting exchange differences are included in 'other operating income' in the statement of income.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE YEAR ENDED 31 DECEMBER 2025

4 SIGNIFICANT ACCOUNTING POLICIES (continued)

4.1 Foreign currency translation (continued)

The non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated into the functional currency at the spot exchange rate at the date the fair value is determined. Foreign exchange differences arising on translation are recognized in the statement of income, except for non-monetary financial assets, such as investments classified as at Fair value through other comprehensive income, which are included in 'investments fair value reserve' in statement of changes in owners' equity. Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction.

4.2 Cash and cash equivalents

Cash and cash equivalents consist of cash in hand, balances with Central Bank of Oman, due from and due to banks and highly liquid financial assets with original maturities of up to three months, which are subject to insignificant risk of changes in their fair value, and are used by the Islamic Window in management of its short term commitments. Cash and cash equivalents are carried at amortised cost in the statement of financial position.

4.3 Murabaha receivable

Murabaha receivables are sales on deferred profits. The Islamic Window arranges a Murabaha transaction by buying a commodity (which represents the object of the Murabaha) and then resells this commodity to customer (beneficiary) after computing a margin of profit over cost. The sale price (cost plus profit margin) is repaid in installments by the customer over the agreed period. Murabaha receivables are stated net of deferred profits and expected credit loss allowance, if any.

4.4 Musharaka

In Musharaka based financing, the Islamic Window enters into Musharaka based on Shirkat-ul-milk for financing an agreed share of fixed asset (e.g. house, land, plant or machinery) with its customers and enters into period profit payment agreement for the utilization of the Islamic Window's Musharaka share by the customer.

4.5 Wakala bil Istithmar

The Islamic Window invests money with banks and other customers on Wakala bil Istithmar basis in return for a Wakala fee. The Islamic Window also accepts money from customers on Wakala bil Istithmar basis on unrestricted Wakala arrangement. The arrangement may include an agreement that any profit over and above the expected profit rate will be retained by Wakil as performance fee. The principal would be responsible to bear any loss of Wakala Capital unless it is due to the negligence of Wakala contractual terms on the part of Wakil.

Wakala Investment Accounting

FAS 31 requires the principal to evaluate the nature of the investment as either a) a pass-through investment or b) Wakala venture.

In case of a pass-through investment approach, the principal shall initially recognize the assets underlying the Wakala arrangement in its books of account applying the initial recognition principles as applicable in line with respective FAS.

In case of Wakala venture approach, an investment shall be accounted for in the books of the investor applying the "equity method of accounting"; where the investment shall be recognized initially at cost and subsequently shall be measured at the end of the financial period at carrying amount and shall be adjusted to include the investor's share in profit or loss of the Wakala venture, net of any agent's remuneration including variable remuneration payable as of that date.

From the principal's perspective, the Islamic Window opted to use Wakala venture approach using equity method of accounting instead of pass-through approach given the practical difficulties for the principal to identify the assets in which funds are invested in and the principal is unable to obtain relevant information with regards to the assets and their performance without undue cost and efforts.

The Islamic Window provides funds to other banks and non-banking customers under this Wakala venture arrangement where the Islamic Window is acting as principal. Those Wakala funds are mainly invested in money market placements and other Shari'a-compliant businesses.

Wakala - Agency Accounting

From the agent's perspective, the standard requires that at inception of the transaction the agent shall recognize an agency arrangement under off-balance sheet approach since the agent does not control the related assets / business. However, there are exceptions to off-balance sheet approach where, by virtue of additional considerations attached to the instrument based on investment agency arrangement, may allow the same to be accounted for as on-balance sheet. An agent may also maintain multi-level investment arrangement.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE YEAR ENDED 31 DECEMBER 2025

4 SIGNIFICANT ACCOUNTING POLICIES (continued)

4.6 Ijarah assets – Ijarah Muntahia Bittamleek

Ijarah Muntahia Bittamleek (Ijarah MBT) is a hybrid Ijarah arrangement which, in addition to the Ijarah contract, includes a promise resulting in transfer of the ownership of the underlying asset to the lessee, either after the end of the term of the Ijarah period or by stages during the term of the contract. Such transfer of the ownership is executed through a sale or a gift, or a series of sales transactions – independent of Ijarah contract.

The Islamic Window, in its capacity either as a lessor or lessee, classifies each of its Ijarah as:

- a. an operating Ijarah;
- b. an Ijarah MBT, including the following types:
 - i. an Ijarah MBT – with expected transfer of ownership after the end of the Ijarah term – either through a sale or a gift; or
 - ii. an Ijarah MBT with gradual transfer – with gradual transfer of ownership during the Ijarah term (including Diminishing Musharaka Ijarah).

Assets acquired for Ijarah are stated at cost, less accumulated depreciation. Depreciation is provided on the straight-line method over the period of the lease or useful life, whichever is lower. Ijarah income receivables represent outstanding rentals at the end of the period less any expected credit losses.

4.7 Investments

Investment securities comprise investments in debt-type, equity-type or other investment instruments.

Classification

Debt-type instruments are a type of investment instruments, whereby the transaction structure results in creation of a monetary or non-monetary liability. Equity-type instruments are the instruments that evidence a residual interest in the assets of an entity after deducting all its liabilities and quasi-equity balances, including ordinary equity instruments and such other structured investment instruments that classify as equity instrument. Other investment instruments are such investment instruments which do not meet the definition of either debt-type or equity-type instruments.

Investments in debt-type instruments are classified into the following categories:

- 1) at amortised cost
- 2) at fair value through other comprehensive income
- 3) fair value through income statement

An investment is measured at amortised cost if both of the following conditions are met:

- a. the investment is held within a business model whose objective is to hold such investment in order to collect expected cash flows till maturity of the instrument
- b. the investment represents either a debt-type instrument or other investment instrument having reasonably determinable effective yield.

An investment is measured at fair value through other comprehensive income if both of the following conditions are met:

- a. the investment is held within a business model whose objective is achieved by both collecting expected cash flows and selling the investment.
- b. the investment represents a non-monetary debt-type instrument or other investment instrument having reasonably determinable effective yield.

An investment is measured at fair value through income statement unless it is measured at amortised cost or at fair value through other comprehensive income through an irrevocable election at initial recognition.

On initial recognition, the Islamic window makes an irrevocable election to designate certain equity instruments that are not designated at fair value through income statement to be classified as investments at fair value through other comprehensive income.

Measurement

Initial recognition

All investments are initially recognized at their fair value plus transaction costs except for investments at fair value through income statement. Transaction costs relating to investments at fair value through income statement are charged to the income statement when incurred.

At the end of each reporting period, investments carried at amortised cost are re-measured as such using the effective profit rate method. All gains or losses arising from the amortization process and those arising from de-recognition or impairment of the investment, are recognized in the income statement. While applying the effective profit rate method, the commencement (or consummation in case of trade-based transaction) date of the respective transaction in line

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE YEAR ENDED 31 DECEMBER 2025

4 SIGNIFICANT ACCOUNTING POLICIES (continued)

4.7 Investments (continued)

Measurement (continued)

Initial recognition (continued)

with Shari'ah is considered as the date of initial cash outflow, if the investment is made at the subscription stage of the instrument or at any time before the commencement (consummation) of such transaction. Investments carried at amortised cost are tested for impairment at each reporting period in accordance with FAS 30 "Impairment, credit losses and onerous commitments".

Subsequent measurement

Investments carried at fair value through income statement are re-measured at fair value at the end of each reporting period. The resultant re-measurement gain or loss, if any, being the difference between the carrying amount and the fair value is recognized in the income statement. All other income and expenses arising from these investments shall be recognized in the income statement.

Investments carried at fair value through other comprehensive income are re-measured at fair value at the end of each reporting period. The resultant re-measurement gain or loss, if any, being the difference between the carrying amount and the fair value is directly recognized in equity under "investments fair value reserve".

Investments carried at fair value through other comprehensive income are tested for impairment at each reporting period in accordance with FAS 30 "Impairment, credit losses and onerous commitments".

Measurement principles

Amortised cost measurement

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus capital repayments, plus or minus the cumulative amortisation using the effective profit method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment. The calculation of the effective profit rate includes all fee and points paid or received that are an integral part of the effective profit rate.

Fair value measurement

Fair value is the amount for which an asset could be exchanged, or an obligation settled between well informed and willing parties (seller and buyer) in an arm's length transaction. The Islamic window measures the fair value of quoted investments using the market bid price for that instrument at the close of business on the statement of financial position date. For investment where there is no quoted market price, a reasonable estimate of the fair value is determined by reference to the current market value of another instrument, which is substantially the same or is based on the assessment of future cash flows. The cash equivalent values are determined by the Islamic window by discounting future cash flows at current profit rates for contracts with similar term and risk characteristics.

4.8 Credit Cards

Credit card receivable is based on the Islamic financial principle of profit-free Qard Hasan whereby the customer is required to repay the utilised amount without any profit. In addition, the customer may be charged a monthly fees which could be waived off at the discretion of the Islamic Window.

4.9 Service Ijarah

Service Ijarah is based on Ijarah principle, whereby Islamic window acquires the services from the third party and then sub-lease it to the customers. Service Ijarah are stated at cost net of expected credit loss allowance if any.

4.10 Istisna receivable

Istisna receivable is a sale agreement between the Islamic window as a seller and the customer as the ultimate purchaser whereby, the Islamic window undertakes to have manufactured (or Acquire) goods and sell it to the customer for an agreed price on completion at future dates. Istisna receivable are stated at net deferred profit and expected credit loss.

4.11 Qard Hasan

Qard Hasan is based on Islamic financial principle of profit-free Qard Hasan whereby, the customer is required to repay the financing amount without any profit. Qard Hasan finance is stated at cost net of expected credit loss allowance, if any.

4.12 Running Musharaka

Running Musharaka is a Shirkat-ul-aqd based financing facility offered to the customers where the Bank participates in the operating activities of the customer and shares profit and loss as per the actual performance of the business.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE YEAR ENDED 31 DECEMBER 2025

4 SIGNIFICANT ACCOUNTING POLICIES (continued)

4.13 Property, equipment and Intangibles

Items of Property, equipment and Intangibles are measured at cost less accumulated depreciation and impairment losses. Cost includes expenditure that is directly attributable to the acquisition of the asset. Depreciation is provided on a straight-line basis over the estimated useful lives of Property, equipment and Intangibles.

The estimated useful lives for the current period are as follows:

	Years
Building.....	25
Leasehold improvements	5 - 10
Computer and other equipment.....	5 - 10
Intangibles	5 - 10
Vehicles	5
Furniture	10

Intangible assets, including computer software and core banking system, are amortised over their estimated useful life of 5-10 years and carried net of accumulated amortisation and impairment losses.

The asset's residual values, useful lives and depreciation methods are reviewed and adjusted if appropriate at each reporting date. Capital work in progress is not depreciated until the asset is put to use.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing the sale proceeds with the carrying amount and are recognised within 'other operating income' in the income statement.

Repairs and renewals are charged to the income statement when the expense is incurred. Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the item of property and equipment. All other expenditures are recognised in the income statement as an expense when incurred.

4.14 Customers' current accounts

Customers' current accounts are treated on the basis of "Qard". No profit or loss is passed on to current account holders, however the funds of current accounts are treated as equity for the purpose of profit calculation for investments account holders and any profit earned / loss incurred on those funds are allocated to the equity of the Islamic Window.

4.15 Equity of investment account holders (Quasi - Equity)

Equity of investment account holders (IAH) are funds held by the Islamic Window in pool of unrestricted investment account, which is invested by the Islamic Window ('Mudarib') in its own discretion. These include funds raised under Mudaraba contracts and Wakala contracts. The funds received under the Wakala arrangement is invested in the investment pool and is considered as investment made by an investment account holder. Under both the Mudaraba and a comingled Wakala arrangement, the investment account holder authorizes the Islamic Window to invest the account holder's funds in a manner which the Islamic Window deems appropriate without laying down any restrictions as to the purpose the funds should be invested. The Islamic Window charges management fee (Mudarib fees) to investment account holders. The allocation of income is determined by the management of the Islamic Window at a pre-agreed ratio with IAH. Administrative expenses incurred in connection with the management of the fund are borne directly by the Islamic Window and are not charged to investment accounts.

Only profits earned on pool of assets funded from IAH are allocated between the owners' equity and IAH. All equity of investment account holders are carried at cost plus profit and related reserves less amounts settled. The basis applied by the Islamic Window in arriving at the equity of investment account holder's share of income is total investment income less shareholders' income. In case of Wakala contracts, the Islamic Window does not act as both an investment agent and Mudarib of the same fund at one time. Therefore, in case of comingling of Wakala investment funds with the Mudaraba pool, the investment agent will only charge Wakala Fee and will not share profits from the Mudaraba investment pool in the capacity of Mudarib. Under FAS 30, ECL is allocated to the assets invested using funds from unrestricted investment accounts.

4.16 Profit equalisation reserve

Profit equalisation reserves are amounts appropriated out of the Mudaraba income, before allocating the mudarib share, in order to maintain a certain level of return on investments for equity of investment account holders.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE YEAR ENDED 31 DECEMBER 2025

4 SIGNIFICANT ACCOUNTING POLICIES (continued)

4.17 Investment risk reserve

Investment risk reserves are amounts appropriated out of the income of equity of investment account holders, after allocating the mudarib share, in order to cater against future losses for equity of investment account holders.

4.18 Revenue recognition

4.18.1 Murabaha

Income on Murabaha transactions is recognised by proportionately allocating the attributable profits over the period of the transaction where each financial period carries its portion of profit irrespective of whether or not cash is received, net of suspended profit.

4.18.2 Musharaka and Running Musharaka

Income on Musharaka is recognised on accrual basis, net of suspended profit.

4.18.3 Ijarah

Rentals accrued from ijarah financings is recognised on a time-apportioned basis over the lease term net of depreciation charged are taken to the income statement, net of suspended profit.

4.18.4 Wakala bil Istithmar

Income from Wakala bil Istithmar placements is recognised on a time apportioned basis so as to yield a expected rate of return based on the wakala capital.

4.18.5 Income from investments

Income from investments is recognised when earned.

4.18.6 Istisna

Profit from Istisna is recognised using proportionate allocation over the futuer financial period of financing whereby, each financial period shall carry its portion of profits irrespective of wether or not cash received, net of suspended profit.

4.18.7 Service Ijarah

Service ijarah income is recognised on the portion basis over the ijarah term, net of suspended profit

4.18.8 Dividend

Dividend income is recognised when right to receive payment is established.

4.18.9 Fee and commission

Fee and commission income recognised when earned.

Commission on letters of credit and letters of guarantee are recognised as income over the period of the transaction.

Fees for structuring and arrangement of financing transactions for and on behalf of other parties are recognised when the Islamic Window has fulfilled all its obligations in connection with the related transaction.

4.18.10 Islamic Window share as a Mudarib

The Islamic Windows' share as Mudarib for managing equity of investment account holders is accrued based on the terms and conditions of the related mudaraba agreement.

4.18.11 Profit suspension

Profit receivable which is doubtful of recovery is excluded from the profit recognised until it is received in cash.

4.19 Provisions

Provisions are recognised when the Islamic Window has a present obligation (legal or constructive) arising from a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of obligation.

4.20 Taxation

Taxation is calculated and paid by the Bank on an overall basis. Taxation expense in these financial statements represents allocation of such taxation to the Islamic Window. The notional tax expense on the Islamic Window result for the year at the statutory effective tax rate would amount to ~~2.231~~ 2.231 million (2024: ~~1.434~~ 1.434 million).

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE YEAR ENDED 31 DECEMBER 2025

4 SIGNIFICANT ACCOUNTING POLICIES (continued)

4.21 Impairment of Financial Contracts

Financing and investment contracts consist of balances with banks and the Central Bank of Oman, due from banks, investment securities, Wakala bil Istithmar, Murabaha receivables (net of deferred profits), Diminishing Musharaka, Ijarah Muntahia Bittamleek, Service Ijarah, Istisna receivable, Qard Hassan, Credit card receivables, Running Musharaka, Sukuk, financing commitments and guarantees and other financial assets.

Impairment assessment - ECL

The Islamic Window applies three-stage approach to measure ECL. Assets subject to ECL approach shall include all financing & investment contracts and off-balance sheet exposures including guarantees, letters of credit, forward foreign exchange and other similar positions. Assets migrate through the following three stages based on the change in credit quality since initial recognition.

Measurement of ECL

The measurement of ECL reflects:

- an unbiased and probability weighted amount that is determined by evaluating a range of possible outcomes;
- reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The Islamic Window approach leveraged the existing regulatory capital models and processes for financing portfolios that use the existing Internal Rating based and behavioral credit models. FAS 30 considers the calculation of ECL by multiplying the Probability of default (PD), Loss Given Default (LGD) and Exposure at Default (EAD).

The Islamic Window measures loss allowances and provisions at an amount equal to lifetime ECL, except for the following, for which they are measured as 12-month ECL:

- debt investment securities that are determined to have low credit risk at the reporting date.
- other financial instruments on which credit risk has not increased significantly since their initial recognition.

Credit loss allowances and provisions are measured using a three-stage approach based on the extent of credit deterioration since origination:

Stage 1 – Where there has not been a significant increase in credit risk (SICR) since initial recognition of a financial instrument, an amount equal to 12 months expected credit loss is recorded. The expected credit loss and provision is computed using a probability of default occurring over the next 12 months. For those instruments with a remaining maturity of less than 12 months, a probability of default corresponding to remaining term to maturity is used.

Stage 2 – When a financial instrument experiences a SICR subsequent to origination but is not considered to be in default, it is included in Stage 2. This requires the computation of expected credit loss and provision based on the probability of default over the remaining estimated life of the financial instrument.

Stage 3 – Financial instruments that are considered to be in default are included in this stage. Similar to Stage 2, the allowance for credit losses captures the lifetime expected credit losses.

For financial assets in Stage 1 and Stage 2, the Islamic Window calculates profit income by applying the Effective Profit Rate to the gross carrying amount (i.e., without deduction for ECLs).

Profit income for financial assets in Stage 3 is calculated by applying the EIR to the amortized cost (i.e., the gross carrying amount less the credit loss allowance).

The key inputs into the measurement of ECL are the term structure of the following variables:

- Probability of default (PD);
- loss given default (LGD);
- exposure at default (EAD)

These parameters are generally derived from internally developed statistical models and other historical data. They are adjusted to reflect forward-looking information.

Details of these statistical parameters/inputs are as follows:

PD – The probability of default is an estimate of the likelihood of default over a given time horizon.

EAD – The exposure at default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date.

LGD – The loss given default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realization of any collateral. It is usually expressed as a percentage of the EAD.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE YEAR ENDED 31 DECEMBER 2025

4 SIGNIFICANT ACCOUNTING POLICIES (continued)

4.21 Impairment of Financial Contracts (continued)

Presentation of allowance for ECL in the statement of financial position

Allowance for ECL are presented in the statement of financial position as follows:

- Financial assets measured at amortised cost: as a deduction from the gross carrying amount of the financial assets;
- Debt instruments measured at fair value through other comprehensive income: no provision is recognized in the Statement of Financial Position because the carrying value of these assets is their fair value. However, the provision determined is disclosed and recognised in the fair value reserve
- Off-balance sheet credit risks include undrawn financing commitments, letters of credit and letters of guarantee: as a provision in other liabilities.

Restructured financial assets

If the terms of a financial asset are renegotiated or modified or an existing financial asset is replaced with a new one due to financial difficulties of the financee, then ECL is measured as follows:

- If the expected restructuring will not result in derecognition of the existing asset, then the expected cash flows arising from the modified financial assets are included in calculating the cash shortfalls from the existing asset.
- If the expected restructuring will result in derecognition of the existing asset, then the expected fair value of the new asset is treated as the final cash flow from the existing financial asset at the time of its derecognition.

Write off

Financing receivables together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realised or has been transferred to the Islamic Window. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the financing impairment account. If a write-off is later recovered, the recovery is credited to the income statement.

4.22 Fair value

Fair value is determined for each financial asset individually in accordance with the valuation policies set out below:

- For quoted investments that are traded in organised financial markets, fair value is determined by reference to the quoted market bid prices prevailing on the statement of financial position date.
- For unquoted investments, fair values is determined by reference to recent significant buy or sell transaction with third parties that are either completed or are in progress. Where no recent significant transactions have been completed or are in progress, fair value is determined by reference to the current market value of similar investments. For others, the fair value is based on the net present value of estimated future cash flows, or other relevant valuation methods.
- For investments that have fixed or determinable cash flows, fair value is based on the net present value of estimated future cash flows determined by the Islamic Window using current profit rates. For investments with similar terms and risk characteristics.
- Investments which cannot be remeasured to fair value using any of the above techniques are carried at cost, less impairment loss, if any.

4.23 De-recognition of financial assets and liabilities

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- the right to receive cash flows from the asset has expired;
- the Islamic Window retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass through' arrangement; or
- the Islamic Window has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

A financial liability is derecognised when the obligation specified in the contract is discharged, cancelled or expires.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE YEAR ENDED 31 DECEMBER 2025

4 SIGNIFICANT ACCOUNTING POLICIES (continued)

4.24 Employee terminal benefits

4.24.1 Terminal benefits

End of service benefits are accrued in accordance with the terms of employment of the Bank's employees at the reporting date, having regard to the requirements of the Oman Labor Law as amended. Contribution to a defined contribution retirement plan and occupational hazard insurance for Omani employees in accordance with the Omani Social Insurance Law of 1991 are recognised as an expense in the statement of profit or loss when incurred.

4.24.2 Short term benefits

Short term benefit obligations are measured on an undiscounted basis and are expensed when the related service is provided.

4.25 Earnings prohibited by Sharia

The Islamic Window is committed to avoid recognising any income generated from non-Islamic sources. Accordingly all non-Islamic income is credited to the charity account where the Islamic Window uses these funds for charitable purposes.

4.26 Zakah

Zakah is calculated in accordance with FAS 9 Zakah using the net assets method. The Islamic Window calculates the "Zakah base" based on audited financial statements and after approval from Sharia Supervisory Board, Zakah payable annually. Payment of Zakah on the investment accounts and other accounts is the responsibility of investments account holders. Please refer note 31 for Zakah per share.

4.27 Offsetting

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Islamic Window has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

4.28 Sharia Supervisory Board

The Islamic Window's business activities are subject to the supervision of a Sharia Supervisory Board consisting of members appointed by the general assembly of shareholders.

4.29 Joint and self financed

Assets that are jointly owned by the Islamic Window and the investment account holders are presented as "jointly financed" in the financial statements. All other assets are "self financed".

4.30 Commingling of funds

The funds of Islamic Window are not commingled with the funds of Conventional Operations of the Bank.

4.31 Trade date accounting

All "regular way" purchases and sales of financial assets are recognised on the trade date, i.e. that date the Islamic Window commits to purchase or sell the assets. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulations or convention in the market place.

4.32 Fiduciary Assets

Assets held in trust or in a fiduciary capacity are not treated as assets of the Islamic Window in the statement of financial position.

5 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of financial statements requires management to make judgements, estimates and assumptions that may affect the application of accounting policies and reported amounts of assets, liabilities, income and expenses. The Islamic Window's significant accounting estimates are in the following:

5.1 Financial asset classification

Assessment of the business model within which the assets are held and assessment of whether the contractual terms of the financial asset are solely payments of principal and profit on the principal amount outstanding.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE YEAR ENDED 31 DECEMBER 2025

5 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (continued)

5.2 Measurement of the expected credit loss allowance and provisions

The measurement of the expected credit loss allowance for financial assets measured at amortised cost and Fair value through other comprehensive income is an area that requires the use of complex models and significant assumptions about future economic conditions and credit behaviour (e.g the likelihood of customers defaulting and the resulting losses). Explanation of the inputs, assumptions and estimation techniques used in measuring ECL is further detailed in note 34, which also sets out key sensitivities of the ECL to changes in these elements.

A number of significant judgements are also required in applying the accounting requirements for measuring ECL, such as:

- Determining criteria for significant increase in credit risk;
- choosing appropriate models and assumptions for measurement of ECL;
- establishing the number and relative weightings of forward looking scenarios for each type of product/market and the associated ECL
- establishing groups of similar financial assets for the purposes of measuring ECL.

5.3 Useful life of property, equipment and Intangible and Ijarah Muntahia Bittamleek

Depreciation is charged so as to write off the cost of assets over their estimated useful lives. The calculation of useful lives is based on management's assessment of various factors such as the operating cycles, the maintenance programs, and normal wear and tear using its best estimates.

5.4 Going concern

The Bank's management has made an assessment of its ability to continue as a going concern and is satisfied that it has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt on the Bank's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

For the year ended 31 December 2025, the Islamic window has recognised a net profit after tax of ~~₹~~ 12.642 million. The Islamic window's quarterly average high quality liquid assets were ~~₹~~ 113.042 million as at 31 December 2025 with the liquidity coverage ratio of 165.17%.

31 ZAKAH

Zakah is directly borne by the owners and unrestricted investment account holders. The Islamic Window uses net investment amount method in order to calculate Zakah amount. The Islamic Window does not collect or pay Zakah on behalf of its owners and its investment account holders. Total due Zakah amounted to ﷲ 0.980 Mn divided into 500,000,000 allocated shares equal to 2.0 baiza per share (2024: ﷲ 0.865 mn equal to 1.7 baiza per share)

32 RELATED PARTY TRANSACTIONS

In the ordinary course of business the Islamic Window enters into transactions with major shareholders, directors, senior management, Sharia Supervisory Board and their related concerns. These transactions are conducted on an arm's length basis and are approved by the Islamic Window's management and Board of Directors.

The year end balances in respect of related parties included in the statement of financial position are as follows:

2024	2025		2025	2024
US\$ '000	US\$ '000		ﷲ '000	ﷲ '000
		Directors, Shariah Supervisory Board and senior management

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE YEAR ENDED 31 DECEMBER 2025

32 RELATED PARTY TRANSACTIONS (continued)

The income and expenses in respect of related parties included in the statement of comprehensive income are as follows:

2024	2025		2025	2024
US\$ '000	US\$ '000		ﷲ '000	ﷲ '000
		Directors, Shariah Supervisory Board and senior management		
42	68	Shariah Supervisory Board remuneration	26	16
12	12	Shariah Supervisory Board sitting fee	5	5

The Islamic Window has not rented any branch premises from a Director during the year 2025 and 2024.

33 FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is an amount for which an asset could be exchanged, or liability settled, between knowledgeable, willing parties in an arm's length transaction.

The fair value of investments classified as fair value through other comprehensive income as at 31 December 2025 is ﷲ 41.017 million equivalent to US\$ 106.54 million with cost amounts to ﷲ 38.763 million equivalent to US\$ 100.68 million & fair value of investments classified as fair value through income statement as at December 2025 ﷲ 71.219 million equivalent to US\$ 184.99 with cost amounting to ﷲ 68.992 million equivalent to US\$ 179.2 million.

Other than investments the Islamic Window considers that the fair value of other financial instruments is not significantly different to their carrying value.

Valuation of financial instruments:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3 - Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

The table below analysis of financial instruments measured at fair value at the reporting date:

	2025	2025	2025	2024	2024	2024

34 FINANCIAL RISK MANAGEMENT

Risk management is an integral part of the Islamic Window's decision making process. The Board of Directors and executive risk committee guide and assist the overall management of the Islamic Window's statement of financial position risks. The Islamic Window manages exposures by setting limits approved by the Board of Directors. The Islamic Window has exposure to the following risk from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk
- Operational risk

In addition, the Bank is in the process of identifying climate risk and acknowledges this as an emerging risk arising from financial instruments that may have growing impact on Bank's activities.

The Board of Directors ("the Board") has overall responsibility for the establishment and oversight of the Bank's risk management framework. The Board has approved the Bank's risk management policies in their specified areas.

The Bank's risk management policies are established to identify and analyse the risks faced by the Bank, to set appropriate risk limits and controls and to monitor risks and adherence to the limits. The risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Bank's activities. The Bank through its training and management standards and procedures, aims to develop a disciplined and constructive control environment, in which all employees understand their roles and obligations.

Executive Risk Committee under the oversight of the Board is responsible for monitoring compliance with the Bank's risk management policies and procedures and for reviewing the adequacy of the risk management framework in relation to the risks faced by the Bank. The Executive Risk Committee of the Board is assisted in these functions by the Risk Management Department. The Risk Management Department undertakes both regular and ad-hoc reviews of risk management controls and procedures, the results of which are reported to the Executive Risk Committee.

34.1 CREDIT RISK

Credit risk is the risk of financial loss to the Bank if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the Bank's loans & advances and financing to customers, due from banks and investment securities but can also arise from credit enhancement provided such as financial guarantees, letters of credit and acceptances. For risk management reporting purposes, the Bank considers and consolidates all elements of credit risk exposure (such as individual obligor default risk, country and sector risk).

34.1.1 TYPE OF CREDIT RISK

Financing contracts mainly comprise Murabaha receivables, Musharaka, Ijarah assets, Wakala, Istisna, Service Ijarah, Running Musharaka and credit card receivables.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE YEAR ENDED 31 DECEMBER 2025

34 FINANCIAL RISK MANAGEMENT (continued)

34.1 CREDIT RISK (continued)

34.1.2 MURABAHA RECEIVABLE (continued)

The Islamic Window finances these transactions through buying a commodity which represents the object of the murabaha and then resells this commodity to the murabaha (beneficiary) at a profit. The sale price (cost plus the profit margin) is repaid in installments by the murabaha over the agreed period. The transactions are secured at times by the object of the murabaha and other times by a total collateral package securing the facilities given to the client.

34.1.3 MUSHARAKA AND RUNNING MUSHARAKA

Musharaka is an agreement between the Islamic Window and a customer to contribute to a certain investment enterprise, whether existing or new, or the ownership of a certain property either permanently or according to a diminishing arrangement ending up with the acquisition by the customer of the full ownership. The profit is shared as per the agreement set between both parties while the loss is shared in proportion to their shares of capital or the enterprise. Running Musharaka is a Shirkat-ul-aqd based financing facility offered to the customers where the Bank participates in the operating activities of the customer and shares profit and loss as per the actual performance of the business.

34.1.4 IJARAH - IJARAH MUNTAHIA BITTAMLEEK

This is a lease whereby the legal title of the leased asset passes to the lessee at the end of the Ijarah (lease) term, provided that all Ijarah instalments are settled.

34.1.5 SERVICE IJARAH

This is lease of services against agreed rentals. The Islamic Banking Window purchases services from third party, service provider by making full payment and then lease it to the customer through Service Ijarah Contract.

34.1.6 CREDIT CARD RECEIVABLES

The Islamic Banking Window takes a fee for the credit card services and there are no charges taken on the amount utilized since, it is based on the Qard principle.

34.1.7 WAKALA BIL ISTITHMAR

This is an investment in which the Islamic window, in its capacity as the "Muwakil" (principal) appoints the customer as "Wakeel" (Agent) to manage the invested funds in Sharia Compliant activities. The investment amount is not guaranteed while the profit rate is anticipated and cannot be fixed. Therefore, the utmost care is taken before taking any exposure.

34.1.8 Credit risk measurement

(a) Financings (including loan commitments and guarantees)

The estimation of credit exposure for risk management purposes is complex and requires the use of models, as the exposure varies with changes in market conditions, expected cash flows and the passage of time. The assessment of credit risk of a portfolio of assets entails further estimations as to the likelihood of defaults occurring, of the associated loss ratios and of default correlations between counterparties. The Islamic Window measures credit risk using Probability of Default (PD), Exposure at Default (EAD) and Loss Given Default (LGD).

(b) Credit risk grading

The Islamic Window uses internal credit risk grading that reflect its assessment of the probability of default of individual counterparties. The bank's internal Risk Rating (RR) system is developed as a 10 grade system - enumerated from RR 1 to RR 10 - to risk rate a customer and to associate a default probability to each rating grade. The ratings will also assist studying the distribution of borrowers, grade wise exposures, transition of credit risk ratings over time, grade wise defaults, Non-Performing Loans (NPL) etc. Risk appetite will also be set in terms of how much of exposure bank expects in various grade bands. The credit grades are calibrated such that the risk of default increases exponentially at each higher risk grade.

Credit quality rating	Risk Rating (RR)	Classification
Standard	RR1 to RR6	Not credit impaired on initial recognition- classified under 'Stage 1'.
Special Mention	RR7	Identified SICR since initial recognition but is not deemed to be credit impaired- Classified under 'Stage 2'.
Non performing	RR8 to RR10	Credit impaired- Classified under 'Stage 3'.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

Collateral held

The collateral held against impaired financing is SAR 22.183 million equivalent to US\$ 57.62 million (31 December 2024 SAR 22.189 million equivalent to US\$ 57.64 million).

Overview of ECL principles

The adoption of IFRS 9 has fundamentally changed the Islamic Window financing loss impairment method by replacing incurred loss approach with a forward looking ECL approach. From 1 January 2018, the Islamic Window has been recording the allowance for expected credit losses for all financing exposure and other debt financial assets not held at fair value through statement of income together with financing commitments and financial guarantee contracts.

34.1.10 Expected credit loss measurement

The ECL Allowance is based on the credit losses expected to arise over the life of the asset (Lifetime ECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on 12 months expected credit loss (12 month ECL). The 12 month ECL is the portion of lifetime ECL that represent the ECLs that result from default events on a financial instrument that are possible within 12 months after the reporting date.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE YEAR ENDED 31 DECEMBER 2025

34 FINANCIAL RISK MANAGEMENT (continued)

34.1 CREDIT RISK (continued)

34.1.10 Expected credit loss measurement (continued)

The Islamic Window has established a policy to perform an assessment on a monthly basis whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument.

Based on the above process, the Islamic Window groups its financing exposure into Stage 1, Stage 2 and Stage 3, as classified below:

Stage 1

When financing are first recognised, the Islamic Window recognises an allowance based on 12 month ECLs. Stage 1 financing exposure also include facilities where the credit risk has improved and the financing exposure has been reclassified from stage 2.

Stage 2

When a financing exposure has shown a significant increase in credit risk since origination, the Islamic Window records an allowance for lifetime ECLs. Stage 2 financing exposure also include facilities, where the credit risk has improved and the financing exposure has been reclassified from stage 3.

Stage 3

Financing exposure considered credit impaired. The Islamic Window records an allowance for lifetime ECLs.

Measurement of ECL

There have been no significant changes in estimation techniques or significant assumptions made during the reporting period.

ECL Exposure of financial assets and off-balance sheet

The following table contains an analysis of stagewise reconciliation of loss allowance from the opening to the closing balance of financial assets / off balance sheet items by class of financial instrument.

Movement in Impairment allowance and provision

	Stage 1 SAR '000	Stage 2 SAR '000	Stage 3 SAR '000	Total SAR '000

Note: Charge for the year includes reversal of suspended profit of RO 0.610 million.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE YEAR ENDED 31 DECEMBER 2025

34 FINANCIAL RISK MANAGEMENT (continued)

34.1 CREDIT RISK (continued)

34.1.11 Significant increase in credit risk (SICR)

The Bank continuously monitors all assets subject to ECLs. When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Bank considers both quantitative and qualitative information and analysis, based on the Bank's historical experience and expert credit assessment including forward-looking information. Retail facilities use the number of days past due (DPD) to determine significant increase in credit risk. For non-retail facilities, internally derived credit ratings have been identified as representing the best available determinants of credit risk. The Bank assigns each facility a credit rating at initial recognition based on qualitative and quantitative information available about the borrower. Credit risk is deemed to have increased significantly if the credit rating has significantly deteriorated at the reporting date relative to the credit rating at the date of initial recognition. In addition, as a backstop, the Bank considers that significant increase in credit risk occurs when an asset is more than 30 DPD. In certain cases, the Bank may also consider that events set out below are a significant increase in credit risk as opposed to a default:

- Inadequate or unreliable financial and other information such as unavailability of financial statements.
- Non-cooperation by the borrowers in matters pertaining to documentation
- Borrower is the subject of litigation by third parties that may have a significant impact on this financial position.
- Frequent changes in senior management
- Intra-group transfer of funds without underlying transactions.
- Deferment / delay in the date of commencement of commercial operations by more than one year
- Modification of terms resulting in concessions granted to the borrower
- A fall of 25% or more in the turnover or in the earnings before interest and taxes (EBIT) as compared to the previous year.
- Erosion in networth by more than 20% as compared to the previous year end coupled with an increase in leverage
- A fall in the debt service coverage ratio to below 1

Further, the following quantitative guidelines are used to determine the staging of accounts:

- An account will migrate to stage 2 if any of the changes in rating below are met;
 - For risk ratings 1 – 4: \geq 3 notch downgrade
 - For risk rating 5: 2 notch downgrade
 - For risk rating 6 : 1 notch downgrade
- An account will also migrate to stage 2 if it is more than 30 days past due.
- An account will also be considered stage 2 if has been placed under special mention as per bank's IFRS 9 staging guidelines which includes if the customer has days past due of 60 days or more but less than 90 days.

34.1.12 Definition of default

The Islamic Window considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Islamic Window in full, without recourse by the Islamic Window to actions such as realising security (if any is held); or
- the borrower is past due more than 90 days on any material credit obligation of the Islamic Window.

In assessing whether the borrower is in default, the Islamic Window considers indicators that are;

- qualitative - e.g. breaches of covenant
- quantitative - e.g. overdue status and non-payment on another obligation of the same issuer to the Islamic Window; and
- based on data developed internally and obtained from external sources.

Inputs into the assessment of whether a financial instruments is in default and their significance may vary over time to reflect changes in circumstances.

Macroeconomic factors, forward looking information (FLI) and multiple scenarios

The measurement of expected credit losses for each stage and the assessment of significant increases in credit risk considers information about past events and current conditions as well as reasonable and supportable forecasts of future events and economic conditions. The estimation and application of forward- looking information requires significant judgement.

An investment is measured at fair value through statement of income unless it is measured at amortised cost or at fair value through equity or if irrevocable classification choices at initial recognition.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE YEAR ENDED 31 DECEMBER 2025

34 FINANCIAL RISK MANAGEMENT (continued)

34.1 CREDIT RISK (continued)

34.1.12 Definition of default (continued)

In its models, the Islamic Window relies on a broad range of forward looking information as economic inputs, such as: real gross domestic product (GDP) growth and oil revenue (as % of GDP). The inputs and models used for calculating expected credit losses may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative adjustments or overlays are made as temporary adjustments using expert credit judgement.

Impact on SICR

The exercise of the deferment option by a customer, in its own, is not considered by the Islamic Window as triggering SICR. However, as part of the Islamic Window evaluation process especially given the current economic situation due to after effects of lock down, the Islamic Window obtained further information from the customer to understand their financial position and ability to repay the amount and in case where indicators of significant deterioration were noted, the customers' ratings and accordingly exposure staging were adjusted, where applicable.

Sensitivity analysis - ECL

The following table shows a comparison of the Islamic window's loss allowances on non-impaired financial contracts (Stages 1 and 2) based on the probability weightings of three scenarios with loss allowances resulting from simulations of each scenario weighted at 100%.

2025			2025	
Impact on ECL	ECL		ECL	Impact on ECL
US\$ '000	US\$ '000		₹ '000	₹ '000
	14,501	ECL on non impaired financial contracts	5,583	
(853)	13,648	Good scenario - 100% weighted	5,254	(329)
(62)	14,439	Base scenario - 100% weighted	5,559	(24)
961	15,462	Bad scenario - 100% weighted	5,953	370

2024			2024	
Impact on ECL	ECL		ECL	Impact on ECL
US\$ '000	US\$ '000		₹ '000	₹ '000
	23,922	ECL on non impaired financial contracts	9,210	
(950)	22,973	Good scenario - 100% weighted	8,844	(366)
28	23,950	Base scenario - 100% weighted	9,221	11
893	24,815	Bad scenario - 100% weighted	9,554	344

For computation of ECL, the Bank considers three scenarios i.e. base, good and bad with weightage of 50%, 25%, 25% respectively.

34.2 LIQUIDITY RISK

Liquidity risk is the risk that the Islamic Window will be unable to meet its payment obligations when they fall due under normal and stress circumstances. To limit this risk, management has arranged diversified funding sources, manages assets with liquidity in mind, and monitors liquidity on a regular basis.

The Islamic Window's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its obligation when due, under normal and stressed conditions without incurring unacceptable losses or risking damage to the Islamic Window's reputation. The Islamic Window has put in place an approved Contingency Liquidity Plan to facilitate management of liquidity.

Liquidity risk is managed by the Islamic Window through closely monitoring the liquidity gap against the limit fixed.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE YEAR ENDED 31 DECEMBER 2025

34 FINANCIAL RISK MANAGEMENT (continued)

34.2 LIQUIDITY RISK (continued)

Adequate liquidity is ensured by Treasury, which receives information from other business units regarding the liquidity profile of their financial assets and liabilities and details of other projected cash flows arising from projected future business. Treasury then maintains a portfolio of short-term liquid assets, largely made up of short-term liquid investment securities, placements with banks and other inter-bank facilities, to ensure that sufficient liquidity is maintained within the Islamic Window as a whole. In this process due care is taken to ensure that the Islamic Window complies with all the Central Bank of Oman regulations and the liquidity ratios were in compliance with regulatory requirements as of year ended 31 December 2025.

The following table summarises the maturity profile of the Islamic Window assets and liabilities as on the reporting date. The contractual maturities of assets and liabilities have been determined on the basis of the remaining period at the reporting date to the contractual maturity date and do not take account of the effective maturities as indicated by the Islamic Window's deposit retention history and the availability of liquid funds.

34.3 MARKET RISK

Market risk is the exposure to loss resulting from the changes in the interest rates, foreign currency exchange rates and equity prices. The objective of market risk management is to manage and control market risk exposures within acceptable parameters while optimising the return to risk. There are no commodity price risk exposures to the Bank.

34.3.1 PROFIT RATE RISK

Profit rate risk is the risk that the Islamic Window will incur a financial loss as a result of mismatch in the profit rate on the Islamic Window's assets and Quasi equity. The profit distribution to quasi equity is based on profit sharing agreements. Therefore, the Islamic Window is not subject to any significant profit rate risk.

However, the profit sharing agreements will result in displaced commercial risk when the Islamic Window's results do not allow the Islamic Window to distribute profits in line with the market rates.

Basel-II Accord has recommended for assessing the impact of profit rate risk by applying upto 200 bps profit rate sensitivity. Earning impact of a 200 basis points parallel shift in profit rate is provided below:

	2025	2025	2024	2024
	₹ '000	US\$ '000	₹ '000	US\$ '000
Net profit earned	17,482	45,408	15,702	40,784
Impact of +200 bps profit rate increase	(1,974)	(5,128)	(1,086)	(2,821)
Impact of -200 bps profit rate decrease	1,840	4,779	1,086	2,821

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE YEAR ENDED 31 DECEMBER 2025

34 FINANCIAL RISK MANAGEMENT (continued)

34.2 LIQUIDITY RISK (continued)

34.3.2 FOREIGN EXCHANGE RISK

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The Board has set limits on the overall open position and for open position for each currency. The open position limits include overnight open position and intraday open position. Open positions are monitored on a daily basis and hedging strategies are used to ensure that positions are maintained within established limits. The Bank also monitors foreign currency risk as per requirements and the same was within regulatory limit as at 31 December 2025.

2024	2025		2025	2024
US\$ '000	US\$ '000		₹ '000	₹ '000
5,213	16,022	US Dollar	6,168	2,007
931	316	Euro	122	358
776	223	UAE Dirham	86	299
152	6	GBP Sterling	2	58
530	8,764	Others	3,374	204

The Islamic Window takes on exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. The Board of Directors set limits on the level of exposure by currency and in aggregate for both overnight and intra-day positions, which are monitored daily. The Islamic window also monitors foreign currency risk as per requirements and the same was within regulatory limit as at 31 December 2025.

Changes in the non-parity foreign currency prices as at 31 December 2025 on net assets is considered negligible.

34.3.3 INVESTMENT PRICE RISK TOGETHER WITH EXPOSURE AND SENSITIVITY ANALYSIS

Equity price risk is the risk that the fair values of equities decrease as the result of changes in the levels of equity indices and the value of individual stocks. The equity price risk exposure arises from the investment portfolio.

2024	2025		Change	2025	2024
US\$ '000	US\$ '000		(+/-)	₹ '000	₹ '000
12,813	25,179	Sukuks	10%	9,694	4,933
3,244	3,973	Open end mutual fund and equity	10%	1,530	1,249

34.4 OPERATIONAL RISK

Operational risk is the risk of loss arising from systems failure, human error, fraud or external events. When controls fail to perform, operational risks can cause damage to reputation, have legal or regulatory implications, or lead to financial loss. The Islamic Window cannot expect to eliminate all operational risks, but it endeavours to manage these risks through a control framework and by monitoring and responding to potential risks. Controls include effective segregation of duties, access, authorisation and reconciliation procedures, staff education and assessment processes, including the use of internal audit.

34.5 CONCENTRATION RISK

Operational risk is defined as the risk of direct or indirect loss resulting from inadequate or failed internal processes, people and systems or from external events. Operational risk arises due to variety of causes associated with the Bank's processes, personnel, technology and infrastructure and from external events and to include risks other than credit, market and liquidity risks.

The Bank's objective is to manage operational risk to avoid/ reduce financial losses to the Bank by establishing necessary controls, systems and procedures. The Bank recognises that an over controlled environment may affect the Bank's business and earnings besides adding to costs. Therefore, the Bank aims at effective management of operational risk through control optimisation and well established systems, methods and governance framework.

The primary responsibility for the development and implementation of controls to address operational risk is assigned to senior management within each business unit. This responsibility is supported by the development of overall Bank standards in the following areas for management of operational risk:

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE YEAR ENDED 31 DECEMBER 2025

34 FINANCIAL RISK MANAGEMENT (continued)

34.5 CONCENTRATION RISK (continued)

- Clear reporting lines
- Proper delegation of powers
- Appropriate segregation of duties and authorisation of transactions through a maker checker system and authorisation matrix reporting lines
- Ownership, reconciliation and monitoring of accounts
- Documentation of controls and processes
- Compliance with regulatory and other legal requirements
- Periodic assessment of the operational risks faced and evaluating the adequacy of controls and procedures to address the risks identified
- Reporting of operational losses and incidents triggering operational losses and remedial action
- Development of contingency plans
- Training, skill upgradation and professional development
- Ethical and business standards
- IT and cyber risks
- Risk mitigation through insurance, where this is cost-effective

Compliance with Bank standards is complemented by a programme of periodic reviews undertaken by Internal Audit. The results of Internal Audit reviews are discussed with the management of the business unit to which they relate, with summaries submitted to the Audit and Compliance Committee and senior management of the Bank. The Bank has a comprehensive Operational Risk Management Framework by which the Bank has put in place Operational Risk Management Policy, Operational Risk Self Assessment (ORSA) Policy, Operational Risk Loss Event Reporting Framework, Maintenance of Operational Risk Loss Data Base.

The Bank carries out a comprehensive Business Continuity (BCP) test on an annual basis.

34 FINANCIAL RISK MANAGEMENT (continued)

34.5 CONCENTRATION RISK (continued)

Concentration by location for financings is measured based on the location of the entity holding the asset, which has a high correlation with the location of the customer. Concentration by location for investment securities is measured based on the location of the issuer of the security.

35 CAPITAL MANAGEMENT

The primary objectives of the Islamic Window's capital management are to ensure that the Islamic Window complies with externally imposed capital requirements and that the Islamic Window maintains strong credit ratings and healthy capital ratio in order to support its business and to maximize shareholders value.

The Islamic Window manages its capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of its activities. In order to maintain or adjust the capital structure, the Islamic Window may adjust the amount of dividend payment to shareholders or issue, return capital to shareholders or issue capital securities. However, no changes are made in the objectives, policies and processes from the previous years as far as management of capital is concerned.

The risk asset ratio is calculated in accordance with the capital adequacy guidelines of the Basel Committee on Banking Supervision and CBO Circulars BM 1009 'Guidelines on Basel II' and BM 1114 'Regulatory Capital and Composition of Capital Disclosure requirements under Basel III' effective from 31 December 2014.

2024	2025		2025	2024
US\$ '000	US\$ '000		﷮ '000	﷮ '000
228,065	259,561	Common Equity Tier 1 (CET1)	99,931	87,805
228,065	259,561	Tier 1	99,931	87,805
4,636	10,319	Tier 2	3,973	1,785
232,701	269,880	Total regulatory capital	103,904	89,590
		Risk weighted assets		
1,779,963	1,836,215	Credit risk	706,943	685,286
32,182	89,462	Market risk	34,443	12,390
74,236	95,068	Operational risk	36,601	28,581
1,886,381	2,020,744	Total risk weighted assets	777,987	726,257
		Capital adequacy ratio		
12.09%	12.84%	CET1 capital expressed as a percentage of total risk weighted assets	12.84%	12.09%
12.09%	12.84%	Total tier I capital expressed as a percentage of total risk weighted assets	12.84%	12.09%
0.26%	0.52%	Tier II capital expressed as a percentage of total risk weighted assets	0.51%	0.26%
12.34%	13.36%	Total regulatory capital expressed as a percentage of total risk weighted assets	13.36%	12.34%

As at the reporting date the capital position of the Islamic Window remains strong and is well placed to absorb the impact of the current disruption.

The capital adequacy ratio given above is calculated in accordance with the Basel II norms as adopted by Central Bank of Oman and IBRF. The capital conservation buffer requirement of 2.5% is maintained at the bank level.

Basel II Pillar III
And Basel III

for the Year Ended
31 December 2025

Report of factual findings to the Board of Directors of Ahli Bank SAOG (the ‘Bank’) or the ‘Engaging Party’) in respect of Basel II - Pillar III Disclosures and Basel III related disclosures for the year ended 31st December 2025

Purpose of the Agreed Upon Procedures Report and Restriction on Use and Distribution

Our report is solely for the purpose of assisting **Ahli Islamic** (the ‘Islamic Window’), Islamic window of **Ahli Bank SAOG** (the ‘Bank’) in reporting factual findings to the Board of Directors of the Bank in respect of the disclosure requirements set out by the Central Bank of Oman via Circular No. BM 1009 dated 13 September 2006 and BM 1027 dated 4 December 2007 issued by Central Bank of Oman (“CBO”) and Basel II - Pillar III Disclosures and Basel III related disclosures and may not be suitable for another purpose.

The report is intended solely for the **Ahli Islamic** (the “Engaging Party”) and Board of Directors of the Bank and should not be used by, or distributed to, any other parties except to CBO. Our report is not to be used for any other purpose, recited or referred to in any document, copied or made available (in whole or in part) to any other person without our prior written express consent. We accept no duty, responsibility or liability to any other party in connection with the report or this agreed upon procedures engagement. This report relates only to the matters specified below and does not extend to any financial statements of the Islamic Window taken as a whole.

Responsibility of the Engaging Party

The Engaging Party has acknowledged that the agreed upon procedures are appropriate for the purpose of the engagement. The Bank is responsible for the subject matter on which the agreed upon procedures are performed.

Practitioner’s Responsibilities

We have conducted the agreed upon procedures engagement in accordance with the International Standard on Related Services 4400 (Revised), Agreed Upon Procedures Engagements. An agreed upon procedures engagement involves performing the procedures that have been agreed with the Engaging Party, and reporting the findings, which are the factual results of the agreed upon procedures performed. We make no representation regarding the appropriateness of the agreed upon procedures.

This agreed upon procedures engagement is not an assurance engagement. Accordingly, we do not express an opinion or an assurance conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported.

Professional Ethics and Quality Control

We have complied with the ethical requirements of the International Ethics Standards Board for Accountants’ *International Code of Ethics for Professional Accountants (including International Independence Standards)* (“*IESBA Code*”) and the independence requirements in accordance with local laws.

Professional Ethics and Quality Control (continued)

Our firm applies International Standard on Quality Management (“ISQM”) 1, *Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements*, and accordingly, maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Procedures and Findings

We have performed the procedures enumerated in Appendix I which are included in BM 1027 dated 4 December 2007 issued by Central Bank of Oman (“CBO”) and which were agreed upon with the Engaging Party in terms of the engagement dated 14 April 2025.

You have acknowledged that the agreed upon procedures are appropriate for the purpose of the engagement.

This report is based on the information provided to us by the management of the Engaging Party. We did not subject the information contained in our report or given to us by management to checking or verification procedures except to the extent expressly stated above. This is normal practice when carrying out such limited scope procedures, but contrasts significantly with, for example, an audit. The procedures we performed were not designed to and are not likely to reveal fraud.

7	Inspected the summary of total Tier 1 capital, Tier 2 capital and Tier 3 capital including other deductions and total eligible capital for any possible omission as required by BM 1009.	No exceptions noted.
8	Agreed the balances for the components disclosed in the summary to the audited financial statements and Islamic Window records.	No exceptions noted.
9	Checked whether any content of the Disclosures are <ol style="list-style-type: none"> internally inconsistent with other parts of the Disclosures in respect of narrative items, inconsistent with numerical data in the Disclosures inconsistent with the audited financial statements of the Islamic Window 	No exceptions noted.

BASEL II PILLAR III AND BASEL III Disclosures

31 DECEMBER 2025

1. INTRODUCTION

Ahli Islamic (the Islamic window) was licensed by Central Bank of Oman (CBO) to operate as an Islamic Banking Window of Ahli Bank SAOG (the Bank) to carry out banking and other financial activities in accordance with Islamic Shari'a rules and regulations.

The following report presents the qualitative and quantitative disclosures related to capital adequacy, risk profile and control process of the Islamic window on a standalone basis as per the requirements of CBO. These disclosures are intended to complement the minimum capital requirements and supervisory review process of Basel framework. They should be read in conjunction with the financial statements as of 31st December 2025.

2. SCOPE

The scope of application of this report is the Islamic window operations of Ahlibank SAOG only. There are no restrictions on the transfer of funds from the Bank to Islamic window, however, under the Islamic Banking regulatory framework (IBRF), title 9, section 1.10.2, Islamic window cannot place funds with the Bank. The Islamic window does not hold controlling interest in any other entity.

3. CAPITAL STRUCTURE

Qualitative Disclosure

The primary objective of the Bank's Capital management framework is to ensure stability by maintaining adequate amount of high-quality capital to commensurate its risk profile. Healthy levels of capital, support the Bank in attaining strong credit rating and maximizing shareholders value. The framework ensures compliance with regulatory capital requirements set by CBO.

The regulatory capital of the Islamic window is calculated as per the guidelines of CBO and is broadly classified in two categories, Tier I and Tier II capital. Tier 1 capital is composed of core capital and is further classified into Common Equity Tier 1 capital ('CET1') and Additional Tier 1 capital ('AT1'). CET1 includes assigned capital, and retained earnings reduced by cumulative unrealized losses on FVOCI investments and intangibles recognized directly in equity. AT1 capital consists of perpetual capital instruments as specified under Basel III framework, however, Islamic window does not have any such instruments outstanding as of the report date. Tier II capital, which includes Stage 1 provision as calculated under IFRS 9 subject to ceilings as per CBO guidelines and investment fair value reserve with regulatory haircut. Equity of unrestricted investment account holders (URIA) is not considered as part of regulatory capital. The Islamic window does not hold any funds from restricted investment account holders (RIA).

There are no amounts in capital adequacy calculation of the Islamic Window which are subject to a different pre-Basel III treatment.

Quantitative Disclosure

The Islamic window's capital structure as at 31 December 2025, based on the CBO guidelines is as follows:

Elements of Capital (﷮ '000)	2025	2024
Tier I Capital		
Assigned capital / Share capital	50,000	50,000
Retained earnings	51,197	38,894
Less: cumulative unrealized losses and intangibles recognized directly in equity	(1,266)	(1,089)
Tier I capital	99,931	87,805
Tier II Capital		
Revaluation reserves / cumulative fair value gains on FVOCI Instruments	773	-
Stage 1 expected credit losses (2024: Stage 1 and Stage 2)	3,200	1,785
Total Tier II Capital	3,973	1,785
Total Regulatory Capital	103,904	89,590
Total equity of investment account holders (Quasi Equity)	880,848	692,077

BASEL II PILLAR III AND BASEL III Disclosures (Continued)

31 DECEMBER 2025

3. CAPITAL STRUCTURE (continued)

CAPITAL ADEQUACY

Qualitative disclosures

The Islamic window's capital management framework sets out to define, measure, raise and deploy capital in a coordinated and consistent manner. Its objective is to maximize its return on capital and, at the same time, provide an adequate cushion to cover any unexpected losses. The Islamic window manages its capital in an integrated manner with the aim of maintaining strong capital ratios. This calls for a balanced approach, maintaining capital levels that are sufficient to provide a high return to shareholders, meeting the requirements of regulators, rating agencies and other stakeholders (including deposit holders and senior creditors) and supporting future business growth. The cost of capital and its composition in terms of its quality and stability is also considered.

The capital management process of Islamic window is aligned with the strategic planning process of the Bank. Capital planning is carried out in conjunction with the strategic business and financial planning exercise. The Bank maintains a five-year rolling strategic plan which is updated and reviewed by the Board of Directors on an annual basis. Capital requirements are assessed based on projected business plans and budget. The Islamic window uses a prudential building-block approach as the measurement technique to assess capital adequacy for current and future activities, which is compared with the eligible capital.

Risk weights are assigned to assets as per the regulatory guidelines from the CBO. Assets funded by investment accounts are also assigned same risk weights as the assets funded by own equity.

The Islamic window's total capital adequacy ratios are 13.36% and Tier 1 capital adequacy ratios is 12.84% as against the CBO requirement of 11% and 9%, respectively, as at 31st December 2025.

The summary of capital adequacy ratio of the Islamic Window is as below:

Particulars	Risk weighted assets 31 December 2025 ﷮ '000's	Risk weighted assets 31 December 2024 ﷮ '000's
On-balances sheet items	682,233	670,959
Off-balance sheet items	24,710	14,327

BASEL II PILLAR III AND BASEL III Disclosures (Continued)

31 DECEMBER 2025

4. Risk Management of the Bank

The Islamic window's risk management is centralized at Bank. It is a process whereby the Bank identifies key risks, applies consistent risk measurement techniques, and recommends which risks to accept or reject or mitigate, by what means and establishes procedures to monitor and report the resulting risk position for necessary action. The objective of risk management is to ensure that the Islamic window operates within the risk appetite levels set by the Bank's Board of Directors while pursuing its objective of maximizing the risk adjusted returns.

Being a window operation, the Islamic window risk management is the overall responsibility of the Bank's Board of Directors. The detailed risk management approach of the Bank, which is also applicable to the Islamic window, is explained in the main Pillar III document. The Bank's risk management processes have proven effective for the Islamic window throughout the current year. The Bank's Board of Directors and various management risk committees have remained closely involved with key risk management initiatives, in ensuring the Islamic window's risks are effectively managed and adequate capital is held in line with the requirements.

Detailed risk governance structure of the Bank, which is also applicable to the Islamic Window is disclosed in the main Pillar III document of the Bank. In addition, a dedicated Shari'a Supervisory Board (SSB) has been established which reports to the Board of Directors of the Bank and ensures Shari'a compliance in the operations of the Islamic Window.

Specifically, the Islamic window has exposure to the following risks:

- Credit risk
- Liquidity risk
- Market risk
- Operational risk
- Rate of return risk
- Displaced commercial risk
- Sharia non-compliance risk

5. Credit Risk

Credit risk arises from the potential financial loss resulting from customers / counterparties failing to honor the terms of their contracts. It also includes the risk of loss in portfolio value as a result of migration from lower risk to higher risk categories. The Islamic window evaluates both settlement and pre-settlement credit risk at the customer level, across all products of the Bank.

Credit risk is the most significant risk incurred by the Islamic window, and proactive management is critical to the Islamic window's long-term success.

The Islamic window has a comprehensive due diligence system for approving credit facilities, and well-defined policies on controlling credit risk at the counter-party, group, economic sector, and country levels.

All corporate, bank and sovereign credit requires independent credit risk review to be approved by authorities, from Level II to the BOD, depending on their delegated credit approval authority (CAA). All credit approvals are strictly in accordance with the regulatory guidelines issued from time to time by the Central Bank of Oman. Exceptions in retail credit exposure are escalated to Risk Management Department for necessary approvals.

Risk Management ensures that the appropriate policies, guidelines, processes and procedures exist to cover all business areas of credit risk. It also ensures the consistent application of credit standards through a diligent Credit Review function and post approval review of financing and investment assets through a financing review mechanism (LRM) function and the periodic review and updating of credit policies, guidelines and procedures.

The Bank also has a robust system of borrowers' risk ratings that assesses the default risk of corporate borrowers and monitors ratings changes periodically. Ratings by the major credit rating agencies are also used whenever available.

The credit risk management policies are governed through Credit Risk Management Committee, Executive Risk Committee of the Board and the BOD. The following is the structure of credit risk approval: -

BASEL II PILLAR III AND BASEL III Disclosures (Continued)

31 DECEMBER 2025

5. Credit Risk (continued)

The Bank has set up internal limits and approval authorities at various Management and Board Level Committees or the full BOD based on the product category like Commercial Banking Lending, Country Limits or Limits for lending to Banks / FIs or Sovereigns, the legal nature of the borrowers and their credit risk rating.

Transaction risk is concerned with the credit risk of a single counter-party. Risk Management ensures that credit is underwritten according to approved standards and that all risks are highlighted in the credit risk review, including policy exceptions. It includes analyzing and reporting on the nature of on- and off-balance sheet counter-party exposure (size, tenor, complexity and liquidity), including secured and unsecured credit facilities.

Concentration risk arises when the Bank disburses a significant amount of credit to a few borrowers or borrowers located in the same geographical location or those exposed to similar economical/political/other risks. To safeguard against concentration risk, sectoral limits have been set for ensuring that the Islamic window is having a well-diversified portfolio, the same is being reviewed by the Bank on a regular basis.

Impairment policy

As a matter of policy, Islamic window creates allowance for impairment of financing contracts promptly and in a consistent manner. The Islamic window has implemented FAS 30 "Impairment credit losses and onerous commitments" accounting norm, based on which impairment is assessed on a forward-looking expected credit loss (ECL) basis, as required by CBO.

The ECL Allowance is based on the credit losses expected to arise over the life of the asset (Lifetime ECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on 12 months expected credit loss (12 month ECL). The 12 month ECL is the portion of lifetime ECL that represent the ECLs that result from default events on a financial instrument that are possible within 12 months after the reporting date.

All financing assets are classified into one of five risk classification categories, Standard, Special Mention (past due between 60 - 90 days), Substandard (past due between 90 - 180 days), Doubtful (past due between 180 - 365 days) and loss (past due for 365 days or more), as prescribed by CBO.

The bank has established a policy to perform an assessment on a monthly basis whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument. Based on the above process, the bank groups its financing exposure into Stage 1, Stage 2 and Stage 3, as classified below:

Stage 1

When financing is first recognized, the bank recognizes an allowance based on 12-month ECLs. Stage 1 financing exposure also include facilities where the credit risk has improved and the financing exposure has been reclassified from stage 2.

Stage 2

When a financing exposure has shown a significant increase in credit risk since origination, the Bank records an allowance for lifetime ECLs. Stage 2 financing exposure also include facilities, where the credit risk has improved and the financing exposure has been reclassified from stage 3.

BASEL II PILLAR III AND BASEL III Disclosures (Continued)

31 DECEMBER 2025

5. Credit Risk (continued)

Stage 3

Financing exposure considered credit impaired. The Bank records an allowance for lifetime ECLs. The Bank considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Bank in full, without recourse by the Bank to actions such as realizing security (if any is held); or
- the borrower is past due more than 90 days on any material credit obligation of the Bank.
- in case of Treasury and interbank balances, when the required intraday payments are not settled by the close of business as outlined in the individual agreements.

Credit risk- Disclosures for portfolios subject to the standardized approach.

Qualitative disclosure

The Islamic window classifies its financial assets in one of the following categories:

- Financing receivables;
- Ijara assets – Ijarah Muntahia Bittamleek;
- Equity & debt – type instruments; and
- Credit Card receivable

BASEL II PILLAR III AND BASEL III Disclosures (Continued)

31 DECEMBER 2025

5. Credit Risk (continued)

Financing receivables are principally divided into following Islamic products:

Murabaha	An agreement whereby the Islamic Window sells to a customer a commodity or a property which the Islamic Window has purchased and acquired based on a promise received from the customer to buy the item purchased according to specific terms and conditions. The selling price comprises of the cost of the commodity and an agreed profit margin.
Financing Ijarah	An agreement whereby the Islamic Window (lessor) leases an asset or services to a customer (lessee), for a specific period against certain rent installments. Ijarah could end in transferring the ownership of the asset to the lessee at the end of the lease period.
Musharaka	An agreement between the Islamic Window and a customer to contribute to a certain investment enterprise, whether existing or new, or the ownership of a certain property either permanently or according to a diminishing agreement set between both parties while the loss is shared in proportion to their shares of capital in the enterprise.
Wakala bil Istithmar	An agreement whereby the principal provides a certain sum of money (Wakala Capital) to an agent, who invests it according to specific conditions in return for a certain fee. The arrangement may also include agreement on an expected profit rate for principal and incentive fee for Wakeel for performance beyond the agreed expected profit.
Istisna	Istisna receivable is a sale agreement between the Islamic window as a seller and the customer as the ultimate purchaser whereby, the Islamic window undertakes to have manufactured (or Acquire) goods and sell it to the customer for an agreed price on completion at future dates. Istisna receivable are stated at net deferred profit and expected credit loss.
Qard Hasan	Qard Hasan is based on Islamic financial principle of profit-free Qard Hasan whereby, the customer is required to repay the financing amount without any profit. Qard Hasan finance is stated at cost net of expected credit loss allowance, if any.

Credit Risk Mitigation (CRM)

Credit Risk Mitigation (CRM) encompasses collateral management and credit guarantee arrangements. The policies and processes for on- and off-balance sheet netting (and the extent to which the Islamic Window makes use of them); policies and processes for collateral valuation and management; and a description of the main types of collateral taken are described below.

The Islamic window normally accepts the following types of collateral:

- Hamish Jiddiyah, Urbun, Profit sharing investment accounts.
- Real estate comprising income-producing and non-income-producing assets.
- Shares listed on recognized stock exchanges located in GCC
- Irrevocable and unconditional guarantees / standby LC issued by acceptable Banks
- Funds subject to meeting approval criteria
- assignment of receivables
- Inventories

The Islamic window also accepts guarantees of individuals and corporates to mitigate risks, wherever applicable, based on adequate assessment of their creditworthiness. In respect of real estate collateral, two valuations are obtained if the value of collateral exceeds a particular level: the lowest valuation is used. The Islamic window also has a mandatory requirement to obtain an insurance policy on real estate collateral (other than land) where the insurance policy is assigned in the Islamic window's favor. Real estate collateral is valued on regular intervals on need basis based on the assessment of risk and economic scenario prevailing.

Management monitors the market value of collateral at regular interval and requests additional collateral in accordance with the underlying agreement in case of shortfall. The management also periodically reviews the collateral cover for determining the adequacy of the allowance for impairment losses. A strong credit administration process ensures effective compliance with terms of approval and documentation.

The Simplified approach for collateral recognition under the standardized approach is applied where 0% risk weight is assigned for the exposure covered by Cash collateral. All other financing exposures to corporates and retail are assigned 100% risk weight (except retail mortgage financings, which are assigned 35% risk weight). The Islamic window stands in possession of cash collateral of ~~₹~~ 0.193 Mn; after application of haircut (0%) to the collateral the exposure stands at NIL. The Islamic window has not considered any financial guarantee under credit risk mitigation as of 31 December 2025.

6. Market Risk

Qualitative disclosure

Market Risk is the risk of loss resulting from fluctuations in profit rates, asset prices, foreign exchange rates or commodity prices. Substantially all of the Islamic window businesses are subject to the risk that market prices and rates will move and result in profits or losses for the Islamic window. The objective of market risk management is to control risks within acceptable parameters, while optimizing the returns. The Bank has a Market Risk Policy that provides detailed guidelines for management of market risks. The Islamic window uses a combination of risk sensitivities, stress testing, etc. to manage market risks and establish limits. The Islamic window does not take any positions in commodities. All relevant risks and mitigation strategies are discussed below

Rate of Return risk in banking book (RRRBB)

Rate of return risk arises from the possibility that changes in rates of return will adversely affect the economic value of equity or the net income. The Islamic window is exposed to this risk as a result of mismatches or gaps in the rate of return profile of balance sheet assets and funds provided by investment account holders and wakala depositors. While the return on profit sharing agreements is not guaranteed, in case the Islamic window does not distribute profit in line with market rates, it is exposed to Displaced Commercial risk.

The Islamic window's overall goal is to manage rate of return sensitivity so that movements in rates of return do not adversely affect the Islamic window's net income and market value of equity. The Islamic window manages this risk by matching the re-pricing profile of assets and liabilities through various risk management strategies, utilizing tools such as gap analysis and duration. ALCO reviews the risk profile and sensitivities on a monthly basis within the risk appetite approved by the Board of Directors. Profit bearing assets (net of provision) and liabilities according to repricing bucket are as follows:

BASEL II PILLAR III AND BASEL III Disclosures (Continued)

31 DECEMBER 2025

6. Market Risk (continued)

Foreign Exchange Risk

Foreign exchange risk is the risk that the foreign currency positions taken by the Islamic window may be adversely affected due to volatility in foreign exchange rates. Foreign exchange risk management is ensured through regular measurement and monitoring of open foreign exchange positions within regulatory and internal limits. All foreign exchange exposures are centrally managed by the Treasury and are daily marked to market. Internal Limits have been assigned with respect to overnight open exposures, stop loss limits and authorized currencies to monitor and control foreign exchange exposures.

The foreign exchange transactions carried out by the Bank are on behalf of customers and are on a back-to-back basis. No proprietary foreign exchange positions are assumed by the Islamic window.

The Net open position in all foreign currencies stands at ₹ 9.753 mn (₹ 6.168 mn position is in effectively pegged currencies) as on 31 December 2025.

Investment Price Risk

Price risk is the risk of losses from decrease in the market value of individual investments. Each investment is approved after rigorous due diligence and exposures are monitored against prudent exposure limits. The Islamic window does not maintain any trading positions in its portfolio as of 31 December 2025.

The Islamic window's investments in non-trading instruments are monitored within the overall limits and restrictions prescribed by CBO from time to time, and only in Sharia compliant product categories. The fair value of equity through other comprehensive income as of 31 December 2025 is ₹ 14.323 mn with cost amounts to ₹ 12.643 mn. The Islamic window also has invested in sukuks carried at fair value through comprehensive income and fair value through income statement. The fair value of investments through other comprehensive income as of 31 December 2025 is ₹ 26.694 mn with a cost amount to ₹ 26.120 mn. The fair value of investments through income statement as of 31 December 2025 is ₹ 71.219 mn with a cost amount to ₹ 68.992 mn.

The Bank has set up internal limits and approval authorities at various Management and Board Level Committees or the full Board of Directors, as a percentage of the Capital Base of the Bank, which apply to the Islamic window as well. All investment proposals are routed through the ALCO to the relevant approval authority. The Islamic window's appetite for private subscriptions and unlisted / unquoted equity is low, and such proposals are adequately justified on a case by case basis, and has to be approved at least by the Executive Credit Committee and by the Board if it exceeds limits structured as a proportion of the Bank's Capital Base.

The Bank tries to achieve reasonable diversification of its investment portfolio among the economic sectors, and does not exceed a certain limit of its investment portfolio in any particular industry / sector groups listed below:

- Trading and retailing
- Real Estate development, management and rental income
- Construction / contracting and building materials
- Travel / tourism, hotels, restaurants, entertainment, health services and education
- Warehousing / storage, logistics, supply management and transportation, utilities and Telecom
- Oil and Gas
- Banking and Financial Services
- Conglomerates or Holding Companies investing in any of the above business lines

Capital Charge:

The Capital Charge for market risk exposures is measured based on Standardized approach in accordance with the guidelines issued by CBO under Circular BM1009. The Islamic window has implemented standardized duration-based approach to arrive at capital requirement for bonds and debt securities. The capital charge for foreign exchange is computed based on three-month daily average of sum of net long or short positions held by the Bank.

Table showing capital charge for profit Rate, Equity and foreign exchange risk as on 31 December 2025 is given below:

Type of risk (₹ '000)	2025	2024
Profit rate risk	1,629	949
Equity position risk	156	42
Foreign exchange risk	971	-
Percentage of NOP to regulatory capital	9.4%	3.3%
Regulatory ceiling (% to total net worth)	40%	40%

Total risk weighted assets for trading book is ₹ 34.443 Mn.

Foreign listed Sukuk	10%	-
Listed equities	10%	+/- 1,502
Unquoted equities	10%	+/- 28

7. Liquidity risk

Qualitative Disclosure

The Islamic window defines liquidity risk as its ability to meet all present and future financial obligations in a timely manner and without undue effort and cost through unconstrained access to funding at reasonable market rates and without affecting asset growth and business operations.

The following key factors are taken into consideration while assessing and managing the liquidity risk of the Islamic Window:

- The need to have a well-diversified base for funding sources, comprising a portfolio of retail customers, large corporates and institutions, small & medium enterprises, high net worth individuals, without significant concentrations or correlations, thereby diversifying the funding base and mitigating concentration risks.
- Based upon the past behavioral pattern analysis of our main liabilities, management expects large portion of customer deposits to be rolled over at contractual maturity.
- As per the CBO directives, the Bank keeps at least 5% of its demand and time deposits with CBO in the form of clearing balances.
- Commitments for loans and advances are approved after considering the Bank's overall liquidity position.

The Islamic window's projected liquidity needs are analyzed, and optimum alternatives to manage the liquidity risk are discussed and approved in ALCO. The risk management department also independently reviews and evaluates the Bank's ability to access liquidity from different sources.

The Treasury and Risk management departments identify liquidity at risk, which is monitored daily and reported periodically to ALCO. Liquidity and funding policy and a contingency liquidity plan have been established by the Bank, which applies to its Islamic window as well.

Liquidity and Funding Policy

The liquidity and funding policy of the Bank, which applies for its Islamic window as well, is intended to ensure that liquidity requirements are prudently and effectively managed such that anticipated and unanticipated funding needs are met on an ongoing basis in a controlled manner at the least possible cost.

The Bank's Asset Liability Committee (ALCO) reviews the Liquidity and funding Policy annually and submits recommendations for changes, if any, to the Bank's Chief Executive Officer (CEO) for review and submission to the Executive Committee and Board as applicable.

There are a number of techniques which the Bank uses to manage its Liquidity position and that of its Islamic Window. The key ones are:

- Placing limits on maturity mismatches
- Maintaining a stock of liquid assets
- Diversification of liabilities
- Access to wholesale markets
- Multi-currency liquidity management

The financing ratio, which is the ratio of the financing to deposits and capital, is monitored on a daily basis in line with the regulatory guidelines. Internally the lending ratio is set at a more conservative basis than required by regulation. The Islamic window also manages its liquidity risk on a monthly basis monitoring the liquid ratio which is a ratio of net liquid assets to total assets.

The Islamic window also maintains significant investments in liquid instruments issued by Governments and banks principally for maintaining liquidity.

BASEL II PILLAR III AND BASEL III Disclosures (Continued)

31 DECEMBER 2025

7. Liquidity risk (continued)

The maturity profile of the assets and funding side at the year-end are based on contractual repayment arrangements. The details of the same are provided in note 34.2 of Islamic window financial statements.

The CBO also restricts the limits on lending by the commercial banks. The maximum lending ratio permissible as at 31 December 2025 was 87.5%.

Details of the reported financing ratio for the year are as follows:

Ratios	2025	2024
Financing ratio	%	%
Year end	84.5	85.1
Maximum for the year	87.4	86.2
Minimum for the year	78.7	60.0
Average for the year	84.7	76.0
Other Ratios		
Financing to customers to total assets	78.2	77.0
Equity to total assets	10.2	11.0
Liquid assets to total assets	15.8	13.4
Liquid assets to short term liabilities	57.0	25.6
Prime assets to volatile liabilities	68.5	72.7
Liquidity Coverage Ratio	165.2	215.5
Net Stable Funding Ratio	128.3	130.5

Stock of Liquid Assets

An adequate stock of high-quality liquid assets provides the Islamic window with the capacity to meet its obligations while any underlying problems affecting liquidity are addressed.

Such assets are clearly identified, their role defined and minimum holding levels are established and agreed by the ALCO. The degree of diversification of the Liquid Assets portfolio is reviewed by the ALCO on a monthly basis.

As per the guidelines of CBO, the bank is required to maintain a Liquidity Coverage Ratio (LCR) of at least 100%. Further, the Net Stable Funding Ratio (NSFR) prescribed at a minimum of 100%. The Islamic window has implemented a more stringent internal requirement for these ratios which are reviewed by ALCO each month. A detailed disclosure on the position of the Bank in regards to these ratios is contained later in this report.

Diversification of liabilities

The Bank and Islamic window seek to maintain a diversified funding base, and monitor the degree of diversification in its liability base on a monthly basis. Depositor concentration is reviewed by the ALCO on a monthly basis.

The liquidity and funding policy recognize the inherent value of the Bank's term depositors. The Islamic window seeks to establish strong and lasting relationships with depositors and other liability holders so as to foster a stable funding base. Trends in liability balances by category are reviewed by the ALCO on a monthly basis.

The Islamic window also recognizes that an over reliance on short dated inter-bank deposits can lead to difficulties in extreme market conditions. The exposure to such deposits is reviewed by the ALCO on a monthly basis.

Multi-currency liquidity

Where positions in specific foreign currencies are significant to its business, the Islamic window addresses the measurement and management of liquidity in these individual currencies. It is considered appropriate to consolidate several (usually minor) currencies and monitor the aggregate exposure expressed in base currency.

When monitoring exposure in aggregate, the Islamic window assesses the convertibility of individual currencies, the timing of access to funds, the impact of potential disruptions to foreign exchange markets, and exchange risks before presuming that surplus liquidity in one currency can be used to meet a shortfall in another currency.

Performance against limits is monitored daily by Treasury with any exceptions being immediately reported to ALCO members. Review of all liquidity positions against limits is performed by Head of Risk Management and Treasury based on figures produced by the Treasury Middle Office / Finance Department.

BASEL II PILLAR III AND BASEL III Disclosures (Continued)

31 DECEMBER 2025

7. Liquidity risk (continued)

The Treasurer along with the Head of Risk Management derives and documents the Maturity Profile behavioral adjustments, based on redemptions and withdrawal requests. These are communicated to the ALCO for discussion and acceptance.

Limit Breaches

All liquidity limit (internal) breaches are notified to the Treasurer, the Head of Finance, Head of Risk Management and ALCO members at the earliest possible opportunity. The notification includes:

- The cause of the breach
- The remedial action taken
- The expected duration of the breach if still current.

Immediate action is taken to remedy the breach. Should such action not be possible, the ALCO and the CEO are notified.

Liquidity Contingency Plan:

It is imperative for the Islamic window to maintain an adequate amount of liquid assets as a protection against a possible loss in the event of emergency situation. Bank's Liquidity Contingency Plan (LCP) is approved by Board and addresses the institution's strategy for handling any liquidity crisis. LCP serves as the blueprint for meeting its funding needs under stress environment in a timely manner and at a reasonable cost. It describes policies and procedures for managing or making up cash flow shortfalls in such situations.

Islamic window has adopted quantitative and qualitative key warning indicators which is monitored by Market & Liquidity Risk team and presented to ALCO. The members of the Liquidity Crisis Management Team (LCMT) and ALCO are notified immediately should any of the early warning criteria be breached.

In the event of the plan being invoked, ALCO delegates the responsibility for the management of the Bank's liquidity to the LCMT. The LCMT is comprised of CEO (Chairman), DCEO Wholesale Banking, DCEO – Support Services, Head of Finance, Head of Treasury and Head of Risk.

8. Operational risk

Operational Risk Framework

Reputation Risk

Reputation Risk is negative public opinion/reaction which could cause damage to the Islamic window's profitability or image. Reputational risk is one of the most complex risks to manage in view of unpredictability, constant change in the operating environment, personnel turnover and multi-cultural environment that the Bank operates in. The Islamic window identifies, measures, monitors and controls reputation risk arising in the following areas:

- Customer service
- Perception of stakeholders regarding Islamic window's commitment to their interests
- Quality of products, services and sales practices
- Reporting to stakeholders and external agencies
- Accuracy of information in communications to the public

There are policies and procedures in place to manage and monitor reputation risk.

Social Media risk is an important element of Reputation risk that has emerged with the popularity of social media and digital technologies. The Bank recognizes the importance of effectively managing the interests of the Bank and its customers from this dynamic and unregulated category of risk. The Corporate Communication Department (CCD) is responsible for managing the Bank's social media activities within the guidelines of 'Social Media Policy'.

Business Continuity Risk

The Bank has a documented Business Continuity Policy (BCP) and plan which outlines the Business Continuity process to be followed in a disaster scenario, and undertakes comprehensive testing of all its critical systems and processes; this BCP also applies to the processes and systems pertaining to the Islamic window. The BCP aims to minimize the severity and impact of a disaster while continuing to serve both the business and customers with a lowest achievable detriment in service. The plan considers the following:

- Disaster scenarios and magnitude
- Various steps to mitigate the risk
- Impact on the Bank's business and operations
- The resources required for resuming the operations at the earliest possible time following the disaster
- Operating processes and available systems at the Disaster Recover (DR) site

BASEL II PILLAR III AND BASEL III Disclosures (Continued)

31 DECEMBER 2025

7. Liquidity risk (continued)

Business Continuity Test

During the year 2025, the Bank has carried out a comprehensive BCP test including a volume test on a working day in order to test the resilience of the bank's business systems at the DR site. The scope of the test was arrived at based on the Business Impact Analysis (BIA) carried by the Bank and the volume test results were submitted to the Board. The Bank has in place a Crisis Management Team (CMT), and the processes to be followed during a disaster scenario has been detailed out in the BCP documents of the Bank.

Concentration Risk

Concentration risk arises from exposure to a common set of factors that can produce losses large enough to threaten the Bank's health or ability to maintain its core business. Concentration risk can arise from large exposure to counterparty, a sector or country. Concentration risk can be mitigated by formulating limits, by a thorough check on counterparty's quality or adequate collateral support etc.

As part of ICAAP, thresholds for exposure concentrations has been set up, this will trigger additional capital requirements based on concentration in terms of large exposures to counterparties, sector exposure concentration (excluding retail lending) and geographical exposure concentration (other than to Oman).

Information Security Risk

The Islamic window has adopted an Information Security Management System (ISMS) /process and a framework by which the bank ensures, protects and secures information resources that process and maintain information which are vital to its operations. The main component of this framework is the Information Security Policy that provides direction for formulation, implementation, and management of Information Security Management System. Since protection of customer information is the top-most priority, the Bank strives to safeguard the confidentiality, availability and integrity of the data of its customers and business partners at all times.

Compliance Risk (including risk of Shari'a Non-Compliance)

Compliance risk is the potential for financial losses, legal penalties, regulatory sanctions and loss to Bank's reputation that result from non-compliance with laws and regulations that are applicable on the Bank. The Board of Directors have direct responsibility for overseeing the management of the Bank's compliance risk. Senior management are thereafter responsible for ensuring effective management of this risk. They are supported by the Compliance function of the Bank which is an independent function that reports, and has direct access to Board Audit & Compliance Committee. The Bank's 'Compliance Policy' sets the guidelines to manage this important risk type.

Shari'a Governance framework ensures Shari'a compliance at all times and at all levels. Shari'a compliance unit facilitates the senior management in ensuring compliance with Shari'a and Islamic banking stipulations of the Central Bank in all its business activities, operations and transactions. Shari'a compliance unit is extensively involved before a new product or transaction is approved and monitors the implementation of guidelines issued by Shari'a Supervisory Board (SSB). No new product class or transaction type is executed without consulting the Shari'a compliance unit and getting a formal approval from the SSB.

Operational risk capital charge and risk weighted amount

The Islamic window follows basic indicator approach for determining operational risk. The Capital charge for operational risk under Basic Indicator approach is calculated by taking the average of gross income multiplied by 15%, for each of the last three financial years, excluding years of negative or zero gross income. The gross income includes Net income from financing activities gross of any provisions and depreciation expense on ijarah assets (+) Net income from investment activities (+) fee income (-) investment account holders share of income.

Item (ﷲ '000)	2025	2024	2023
Net Income from financing and investing activities	46,035	40,695	32,811
Other income – net	8,536	6,598	3,101
Gross Income	54,571	47,293	35,912
Return to investment account holders	(28,553)	(24,993)	(17,848)
Net Operating Income	26,018	22,300	18,064
Average Income	22,127		
Gross Income times of Alpha (15%)	3,319		
Operational risk based on Basic Indicator Approach	41,489		

Capital Charge for Operational Risk under Basic Indicator Approach as per Basel II is ﷲ 2.928 million as of 31 December 2025. The Risk weighted assets for operational risk as per Basel II is ﷲ 36.601 million.

BASEL II PILLAR III AND BASEL III Disclosures (Continued)

31 DECEMBER 2025

9. DISPLACED COMMERCIAL RISK

Displaced commercial risk (DCR) refers to the market pressure to pay returns that exceeds the rate that has been earned on the assets financed by the liabilities, when the return on assets is under performing as compared to competitor's rates.

The Islamic window has in place a Profit Distribution Policy which specifies detailed guidelines for creation of PER and IRR to mitigate the DCR. The Islamic window may forgo its fee in case DCR arises. Rates of returns are benchmarked with other Banks in the market and reviewed on periodic basis.

An analysis of distribution during the year to IAH's (Modaraba Deposits Only) by Islamic window is as follows:

	2025	2024	2023	2022	2021
Total Profits available for distribution	16,394	13,693	11,176	10,752	9,321
Profit Sharing:					
- Profit to Shareholders	15,434	11,567	9,087	8,531	7,498
- Share of IAH	342	1,638	1,669	1,866	1,272
- Mudarib Share	618	488	420	355	551

During the year ended 31 December 2025, Islamic Window has appropriated ~~₹~~ 0.130 mn towards Profit equalization reserve.

10. INVESTMENT ACCOUNT HOLDERS

The Islamic window receives deposits by Investment Account Holders (IAH) under Mudaraba contract and Wakala bil Istithmar contract. The Islamic window has Unrestricted Account Holders only.

Equity of investment account holders

Equity of investment account holders are funds held by the Islamic Window in unrestricted investment accounts, which it can invest at its own discretion. The investment account holder authorizes the Islamic Window to invest the account holders' funds in a manner which the Islamic Window deems appropriate without laying down any restrictions as to where, how and for what purpose the funds should be invested. The Islamic Window charges management fee (Mudarib fees) to investment account holders. Of the total income from investment accounts, the income attributable to customers is allocated to investment accounts after setting aside provisions, reserves (Profit equalization reserve and Investment risk reserve, if any) and deducting the Islamic Window's share of income as a Mudarib. The allocation of income is determined by the management of the Islamic Window within the allowed profit-sharing limits as per the terms and conditions of the investment accounts. Administrative expenses incurred in connection with the management of the funds are borne directly by the Islamic Window and are not charged separately to investment accounts. Investment accounts are carried at their book values and include amounts retained towards profit equalization and investment risk reserves, if any. Profit equalization reserve is the amount appropriated by the Islamic Window out of the Mudaraba income, before allocating the Mudarib share, in order to maintain a certain level of return to the deposit holders on the investments. Investment risk reserve is the amount appropriated by the Islamic Window out of the income of investment account holders, after allocating the Mudarib share, in order to cater against future losses for investment account holders. Creation of any of these reserves results in an increase in the liability towards the pool of unrestricted investment accounts.

Only profits earned on pool of assets funded from IAH are allocated between the owners' equity and IAH. All equity of investment account holders is carried at cost plus profit and related reserves less amounts settled. The basis applied by the Islamic Window in arriving at the equity of investment account holder's share of income is total investment income less shareholders' income. In case of Wakala contracts, the Islamic Window does not act as both an investment agent and Mudarib of the same fund at one time. Therefore, in case of comingling of Wakala investment funds with the Mudaraba pool, the investment agent will only charge Wakala Fee and will not share profits from the Mudaraba investment pool in the capacity of Mudarib.

Profit Distribution Mechanism between Shareholders & Depositors under the Common Pool

Participation factor, Weights or profit-sharing ratios are pre-decided by the management of the Bank. In case of any change, after approval by the Shariah Supervisory Board these are intimated to the investors before start of the month. Weighted average balance is calculated at the end of the period by multiplying the participation factor with average balance for the period.

The Islamic window has a single pool of comingled assets where the funds of investment account holders are invested. The Investment Profits are distributed between Mudarib and IAH in the following percentages:

BASEL II PILLAR III AND BASEL III Disclosures (Continued)

31 DECEMBER 2025

10. INVESTMENT ACCOUNT HOLDERS (continued)

	2025	2024
Unrestricted Investment Accounts Share	75%	75%
Mudarib Share	25%	25%

The Islamic window does not charge Investment account holders for operating expenses incurred.

Mudaraba fee

Mudaraba fee will be deducted from allocated profit as per the pre-agreed ratio as approved by SSB which will be advised to customers through website or by posting in branches. Islamic window can create reserves as allowed by SSB and CBO for smoothing of returns to investors and risk management purposes. Two types of reserves allowed are Profit Equalization reserve (PER) and Investment Risk reserve (IRR).

Investment Risk Reserve (IRR)

This reserve is created out of the depositors' share of profit out of the Net Profit from the Common Pool. Purpose of the reserve is to offset the effect of future losses. The available balance in the reserve account shall be invested in the Common Pool and the profit earned by investing such balance will be added to the reserve account. The basis for computing the amounts to be appropriated are applied in accordance with SSB directions. This is to secure suitable and competitive return to the depositors in case there are certain extra ordinary circumstances, depressing the return, which were anticipated by the depositors. The disposition of the reserve amount will take place with the prior approval of the SSB. In case the balance in the reserve account is not sufficient to face the competition, the shareholders may grant part of their share of profit to the depositors with the approval of SSB.

Transfer to or from Profit Equalization reserve (PER)

Percentage to be approved by Bank management subject to internal sharia approval that should be appropriated by Islamic window out of the total common pool profit as per the policy before any distribution takes place, in order to ensure certain level of cushion for the Investment portfolio. Any provisions that are required against the Islamic financing assets or investments will be provided in the books as per the policy which will be in adherence to the central bank revised provisioning policy. The balance of the PER shall also be maintained as a current account.

Transfer to or from (IRR)

In case the rate of return to the depositors in a certain profit distribution period is substantially higher than the market rates, Bank's management may decide to deduct, after taking permission from the SSB, a portion of depositors' share of profit and transfer the same to the IRR.

In case the rate of return to the depositors in a certain profit distribution period is lower than the market, Bank's management may decide to compensate the depositors by transferring the required amount from the said reserve account to increase depositors' return.

No IRR has been created and no transfer has been made during the year ended December 2025.

Assignment of a portion of shareholders' profit to depositors

If required, the Islamic window may decide to allocate some portion from their own profit to a specific deposit category(s). This could be either due to increase in the rate of profit announced by other Islamic Financial Institutions / competitors or to encourage a specific category of depositors.

No assignment of shareholder profit to depositors has been made during the year ended December 2025.

Running Musharaka	169	-
Other Assets & off-balance sheet items	47,076	32,404
Total	706,943	685,286

12. ZAKAH

Zakah is calculated in accordance with FAS 9 Zakah issued by Accounting and Auditing Organization for Islamic Financial Institutions (AAOIFI) using the net assets method. The Islamic Window will calculate the “Zakah base” based on audited financial statements and after approval from Sharia Supervisory Board, notify the Shareholders of their pro-rata share of the Zakah payable annually, if any. Payment of Zakah on the Investment Accounts and other Accounts is the responsibility of Investments Account Holders.

13. EARNINGS PROHIBITED BY SHARIAH AND THE CHARITY PAYMENTS BY CUSTOMERS IN SITUATION OF LATE PAYMENT

The Islamic window is committed to avoid recognizing any income generated from non-Islamic sources. Accordingly, all non-Islamic income is credited to the charity account where the Islamic Window uses these funds for charitable purposes. During the year ended 2025, income amounting to ~~RM~~ 0.001 Mn has been credited to charity account being prohibited by Sharia. And the amount ~~RM~~ 0.023 Mn has been received in the charity account for late payments. Sources and use of charity by fund have been disclosed in statement of sources and uses of charity fund in Financial Statements. With regard to undistributed funds under charity account as of year ended 2025, Islamic window has taken approval from SSB for deferment of disbursement to next year.

14. COMPENSATION POLICY AND REMUNERATION OF SHARIA Supervisory BOARD (SSB)

In line with the CBO guidelines on remuneration disclosure as part of pillar III, the relevant qualitative and quantitative disclosure are presented in the banks Basel II Pillar III.

Following remuneration of Sharia Board has been approved by the general assembly;

Chairman: ~~RM~~ 10,000 per annum (US\$ 25,974 per annum).

Member: ~~RM~~ 8,000 per annum (US\$ 20,779 per annum).

Sitting fee: ~~RM~~ 385 (US\$ 1,000) per meeting per member, maximum of 5 sitting per year.

Details of Sharia Supervisory Board and meetings attended during the year has been disclosed in corporate governance report.

BASEL II PILLAR III AND BASEL III Disclosures (Continued)

31 DECEMBER 2025

15. GENERAL DISCLOSURES

Shari'a governance

Shari'a governance is the most important feature of the Islamic window. Shari'a governance is defined as a system whereby the Bank attempts and abides by the Shari'a principles in all its activities. The main objective of Shari'a governance framework is to ensure Shari'a compliance at all the times and at all levels and that is to enable the Islamic Window to be perceived as fully Shari'a compliant by all aspects. The key elements of Shari'a governance framework of the Islamic window are as follows:

- Shari'a Supervisory Board (SSB)
- Head Shari'a Audit and Compliance/Internal Shari'a Reviewer (Head SAC)
- Shari'a Audit Unit (SAU)
- Shari'a Compliance Unit (SCU)
- Shari'a Risk Control Unit (SRCU)

Shari'a audit and compliance department

As per the Shari'a governance structure of the Window, Shari'a Audit and Compliance Unit (SACU) is a full-fledged department of the Bank. The Shari'a Audit and Compliance includes SAU SCU and Shari'a Risk Control function and is led by Head Shari'a Audit and Compliance / Internal Shari'a Reviewer. SACU main function is to ensure Shari'a compliance of the Islamic Window and objectively examine and evaluate the extent of compliance of the Bank in view of the pronouncements issued by the SSB or its Chairman and in adherence to the regulations issued by CBO

SACU has direct and regular communication with all levels of management, the SSB, and external auditors and it is provided with full and continuous support of management and the SSB to perform its duties. SACU works under supervision of the SSB to ensure independence and objectivity in performance of department's tasks.

Trainings

The Shari'a Audit and Compliance Department (SACD) prepared a comprehensive training plan for year 2025 and got that approved by the SSB. In accordance with the training plan, Shari'a Audit and Compliance prepared material on Ahli Islamic Products and their Shari'a Principles by including essential features of Islamic banking, Shari'a governance, Shari'a structures of Islamic banking products and their process flows, list of legal documentation and Shari'a principles underlying to each product. The training material was made in line with SSB directives, Islamic banking guidelines issued by CBO and AAOIFI Shari'a Standards. The trainings were made as mandatory for the related staff of Ahli Islamic and Ahli Bank.

The trainings were conducted by SACD as per SSB approved Training Plan for 2025 for staff of the Bank. Additionally, online training and learning arrangement was made by Shari'a Department in coordination with the Bank T&D. The training was made mandatory for entire bank staff (Ahli Islamic and related staff) with requirement of passing a test at end of the training. Also, Head SAC gave a two days training on Shari'a audit which was conducted by CBFS. The Shari'a Auditor accomplished the two days Shari'a audit course. Manager Shari'a compliance was facilitated to attend the course on Driving Innovation in Islamic Finance: Exploring the Role of Digital Transformation, AI, and Fintech conducted by CIBAFI and AAOIFI Shari'a Standard course organized by Imam Jaber bin Zaid Foundation. The SSB members, Head SAC and Head of Ahli Islamic were facilitated to attend the INCEIF University Shari'a Scholars Forum in Uzbekistan. Additionally, the SSB members were sponsored to attend the AAOIFI Shari'a Board Members conference in Bahrain and Islamic Banking conference conducted by Madina university.

For 2026, annual training budget is in place for employees as part of the bank's overall training and development budget. The continued development, qualification and certification of all Islamic Banking personnel is an ongoing process.

Complaints

Ahli Bank has devised “Code of Ethics and Fair Practices - Customer Complaints Redressal Policy & Procedure” and same is implemented for the Islamic window with regard to professional ethics as well as procedure to resolve customers' queries and complaints. According to the policy, any Islamic Banking related enquiries and complaints are sent to related department of Islamic banking to address and advice and there is proper mechanism in place and a responsible person is identified who collects complains and send the same to the relevant staff.

The Islamic window has trained customer services representative in all the branches who provide appropriate guidance to customers in selection of relevant products suitable to the individual investors. Further, complete product booklet is available at the branches and on the Bank's website which can be referred in case of any further clarification is required. Customers can call the call center number 24577177or walk in any of the branches to register their complaints.

BASEL II PILLAR III AND BASEL III Disclosures (Continued)

31 DECEMBER 2025

15. GENERAL DISCLOSURES (continued)

Awareness

The Bank has trained customer services representatives in all business units who provide appropriate guidance to customers with regard to Islamic Banking products and services. Furthermore, products' brochures are made available at all the branches for customers information and knowledge. Products' feature and related SSB Fatwa and glossary of Islamic banking are also available on the website for public information. Additionally, during 2025 Sharia Audit and Compliance team has regularly been meeting with customers and clients and explaining them about Islamic banking products and their conditions.

Related Party

Disclosures related to related party and transactions during 2025 are disclosed in note 32 of Islamic window financial statements.

16. SUBSIDIARIES AND SIGNIFICANT INVESTMENTS

The Islamic Window does not have any subsidiary or other significant equity investments as on 31 December 2025.

17. BASEL III REGULATORY CAPITAL DISCLOSURES

Below disclosures are prepared using three step reconciliation approach as defined in the CP2-Guidelines on composition of capital disclosure requirements issued along with the CBO Circular BM 1114.

BASEL III common disclosure template (ﷲ '000)			
	2025	2024
